

Screw Caps For Tubes

polygonal-shaped

Create skincare products in a simple and
EXTRAORDINARY way.

Four white tubes are shown diagonally across the top half of the image. Each tube has a different colored screw cap: the first has a yellow hexagonal cap, the second has a white hexagonal cap, the third has an orange circular cap, and the fourth has a black hexagonal cap. There are also yellow geometric shapes in the corners: a triangle in the top left and a hexagon in the bottom right.

Screw caps for tubes, the simple closure that keeps tube packaging secured during transit and easy for daily usage, have **limitless shapes** and **styles**.

One is to implement geometric design to create the screw cap styles and turn an ordinary packaging tube into an extraordinary one. A plain circle or square is no less than a hexagon to achieve an aesthetic packaging design.

And here are a few popular ones among beauty and skincare brands.

Circular
