3-step Skincare

A Personalized Beauty Experience

Presenting products with Airless Shuttle, the consumers receive not just another skincare product but their very one set of solutions tailored to the user's unique skin condition.

Airless Shuttle simplifies the skincare routine with the three refillable ECO Airless Bottles, advances personalized beauty experience.

the simpler, the better

Fashion companies and leading brands have all sorts of sustainable marketing campaigns to slow down the environmental impact caused by business activities. One of the many things would be providing a simplified commodity, and Airless Shuttle is the answer.

trends & personalization

Customized user experience slowly shifts from the luxurious segment to the mainstream while the beauty trends continue to spur. Leaving the option open to the consumers can lead to the next most discussed topic, which benefits both the users and the brands.

Clean Beauty Skincare Solution

Airless Shuttle has three recyclable airless cartridges, known as PCR Airless Bottle, fixated within a reusable dispensing system.

PCR Airless Bottle has 70% post-consumer recycled resin (PCR PE) and is a patented airless bag-in-bottle design that reduces 70% of plastic compared to a syringe-type airless bottle.

Its 100% vacuum-sealed EVOH+PP inner pouch is highly compatible with any skincare or SPF formulae. It is also known as excellent protection for preservative-free products.

Combined with SRP's exclusive airless pump or airless sprayer that offers a precise dosage of 0.2 cc, users can dispense products with ease, even upside-down.
