One place for innovations and aesthetics

Brands that offer unlimited skincare and beauty solutions for the consumer world are always hungry for innovations and aesthetic designs.

They entrust SR Packaging for new projects, working from concept, packaging application, tooling, decoration to manufacturing, use packaging to protect the delicate formulae and as a medium to maximize brand value and secure customer loyalty.

Decoration

Special Treatment

Plastic Colorants
Enables the molded-in color during the molding process.

Apply to     

Spray Coating
Adds a thin layer of glittery sheer, metallic glow, or a UV cured protection on the surface of a component.

Apply to     

Flexo-Printing
Creates high-resolution, poster-quality imagery design with perfect finish.

Apply to 

Offset Printing
Uses plates to transfer ink up to 8 colors, including half-tone and gradation, of artwork requiring precision.

Apply to 

Metalsheen
Allows any PET package to evince metallic luster.

Apply to   

Metallization
Gives a plastic part a shiny, faux-metal finish, with the ability to add more decorations.

Apply to     

Brushed Metal (ABL Tubes)
It mimics unidirectional satin finishes on metal and creates an aesthetic pattern on ABL tubes.

Apply to 

Silk Screen Printing
Decorates surface with texts or images of thick, bold, and glossy finish.

Apply to    

Gradients
Gradient, Translucent Gradient, and Vac Met Gradient are achievable with adjustable opacity and translucency.

Gradient Apply to    

Vac Met Gradient Apply to   

Soft Touch
Gives sensational feedback on the fingertips, a matte, frost, tactile touch.

Apply to   

UV-alarm
Color-changing under the Sun - the plastic components with photochromic dyes can react to UV light exposure.

Apply to  

Mold Texturing
Allows for intricate and consistent designs to be added to injection molds for decorative purposes.

Hot Stamping
Enriches a brand image with solid, metallic colors.

Apply to      

Patterned Metalization
Creates a unique pattern by adding over-coatings and UV processing to the known metallization process.

Apply to     

Shrink Wrapping
Enables full-color printing for the whole bottle. It is easy to tear off for post-use recycling.

Apply to 

Fabric Touch
Mimics the natural fabric texture and adds a warm touch to the tube surface.

Apply to 

Labeling
Labels can be dhesive paper or foil, with diverse materials and finishes to create striking graphics, 3D designs, even braille.

Apply to    

Marbling Injection
Adds a unique identity for each component, offers aesthetically natural patterns without repetition.

Apply to   

Double Coat Anodizing
Achieves the design with the 3-step process: Anodizing - Silk Screen Print - Anodizing.

Apply to    

Brushed Metal (aluminum components)
Creates a superior, warm and metallic shear for aluminum components in customizable color.

Apply to

Economic Benefits of EBM Airless

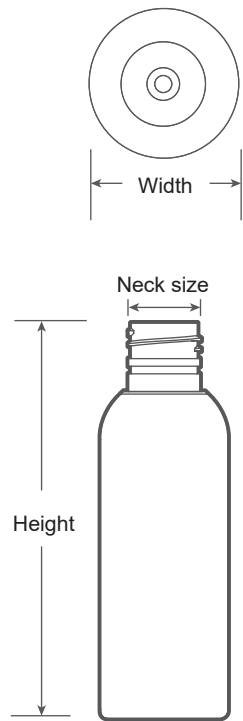

- ★ Same OFC as dip-tube bottles.
- ★ Works with all viscosity types.
- ★ Fills like an atmospheric pump.

INFOGRAPHIC OF DISPENSING OPTIONS.
The ones without specifying are all dual-spring mechanisms.

► SPRAYER

Internal Dual-Spring
Produces super fine mist spray.

Eternal Singular-Spring
Protects content from metal contact.

► LOTION Pump

Eternal Singular-Spring
Dispenses content of high viscosity, with a cream-like, thick texture.

Internal Singular-Spring
Dispenses content of high viscosity.

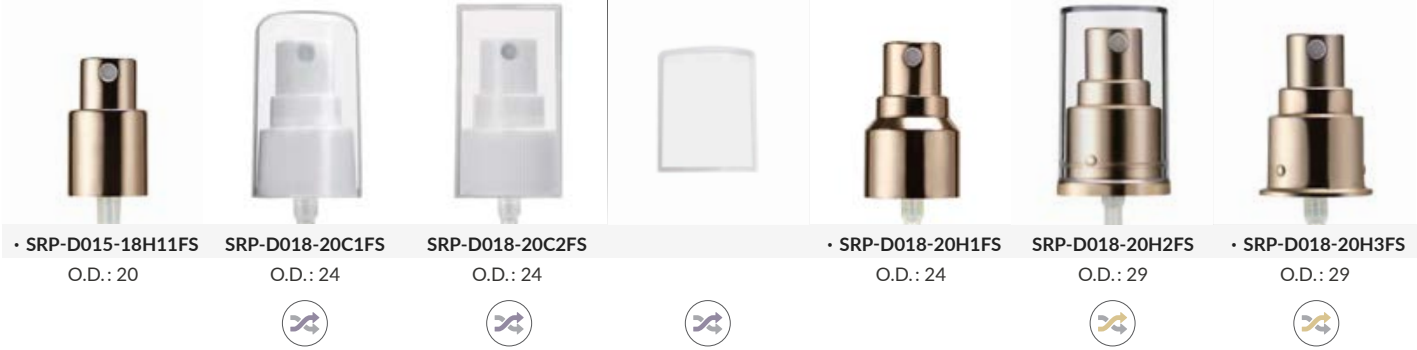

SPRAYER (INTERNAL DUAL-SPRING)

SCALE 1:1

 Made-in-America tube supply

Customize tubes made-in-America

- ★ Works with all viscosity types.
- ★ Custom Color Matching.
- ★ Finish, glossy or matte.
- ★ Silkscreen printing, up to 3 colors.
- ★ Hot stamping.
- ★ Tamper evident seal: aluminium foil for orifice seal.
