

Shine and Bright! ABL tubes help brands to maximize **WOW effect.**

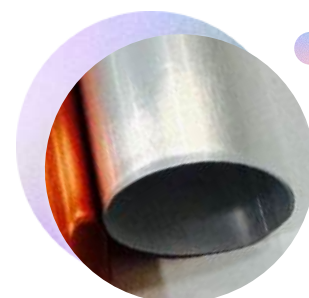

Shimmer, shining, brilliant, fabulous, astonishing, all the visual requirements lead to one packaging design task - - - to attract consumers to SEE and take the products home.

[Replicate the mystic brightness]

Imagine how aurora and twilight wow the human mind. Light has a mystic power to attract and result in endless color changes. By mimicking ultraviolet brightness, the silvery, high-shine ABL tubes are here to achieve customized bright colors to recreate the beauty of light and enchant brands' target consumers.

[Color-matching to the desired, vivid visual effect]

Whether it's an image or photograph used for project brainstorming, a piece of color reference, or an object that seizes the imagination of product development managers, SR Packaging provides professional know-how, helps brands select from ABL material options, and directs the color-matching process to the goal.
