

Ensure every playground, skatepark and outdoor fitness area are inspected and maintained to be as safe as possible

PSSLive+ Built for Play

Standards-Driven Safety

Pre-loaded Finding & Task libraries intelligently mapped to BS EN 1176, 1177, 14974, 15312 and 16630.

Sector Specific Fields

Maintain a comprehensive knowledge base for your Assets including play specific fields such as EN Compliance, Age range, Impact area, EN defined - Asset Category, Type and Sub Type, and play value.

Set Scheduled Inspections

Set up Scheduled Inspections aligned to BS EN guidelines and local Risk Management policy requirements.

Inclusive and Accessible Play

Built-in Accessibility and Exclusivity checklist and scoring tool.

External Inspector Access

Annual Inspectors log Inspections directly into your database via their own secure accounts—increasing transparency and reducing duplication of effort.

FOI and Claim Defence

Time-stamped photos, GPS & signature capture create filterable data exports or quick to create PDF reports. Advanced data analysis from powerful grid filters aids interrogation to support decisions and prove duty of care.

Risk Transparency

Dynamic Risk scores alert you to high-severity Findings or overdue Schedules for prioritised action.

Quick facts

- RPII-Approved Training Centre – keep staff certified in-house.
- Works hand-in-glove with your Risk Management Policy; optional Dynamic Risk Assessment on every Inspection.
- Supports daily to annual regimes in a single solution; record Inspection by Site or Asset.
- GIS layer toggle: highlight high-risk assets, surfacing types or inclusive equipment at a glance.
- Improves working with external Contractors and outsourced Inspectors — give access permission for a single source of data capture, assign and email Tasks via Works Orders, set up notifications on works.

Proven in the Field

Customers report cutting FOI response time on play data queries from two days to under ten minutes using PSSLive+ filters and PDF templates.
