

PSS

Purpose-built software for the teams managing public assets.

Asset, inspection, and task management software that works as hard as the teams who use it. Purpose-built with councils, housing services, and grounds teams for over 35 years.

Every inspection recorded.
All tasks accounted for.

PlaySafe+

Asset Inspection & Compliance

A complete, real-time inspection record you can rely on. Findings prioritized by risk, tasks managed by urgency, inspections scheduled - keeping you in control. When a claim arrives or an FOI lands, the answer is already there.

What PlaySafe+ helps you to do

Record inspections, tasks and operations

Maintain a complete, defensible audit trail

Capture time-stamped records with photos and video

Gain instant visibility across all your sites and assets

Support compliance and risk management

Eliminate paper processes and reduce administration

Standardize records across all departments

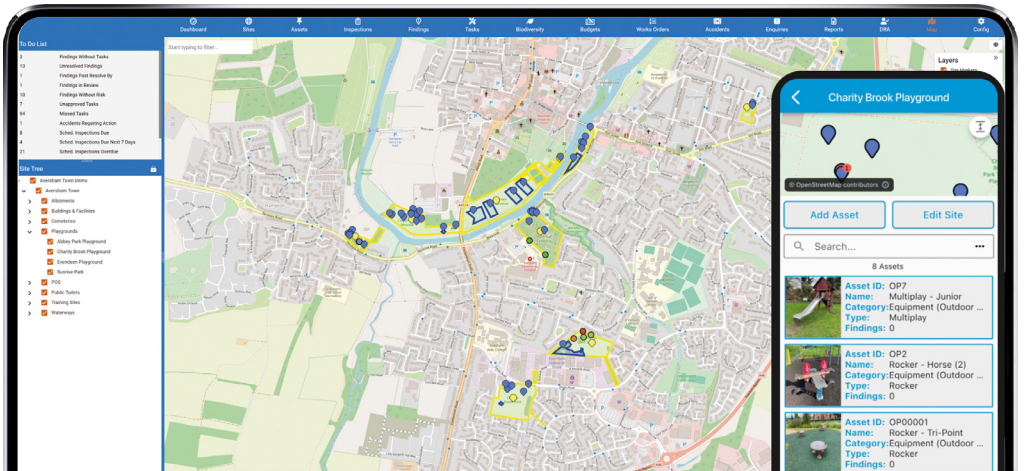

Support claims defense, FOI and compliance reporting

No duplicated records. Clear workflows. Every decision defensible.

A complete, real-time inspection record you can rely on.

Standards as standard.

PlaySafe+ manages inspections, findings, assets, maintenance and compliance activity across public spaces and operational environments.

Inspections configured and scheduled to requirements. Findings prioritized by risk and linked to asset-specific Tasks. Findings grouped into libraries based on standards and maintenance knowledge, developed alongside industry experts. Tasks managed by urgency - keeping you in control with a clear and complete workflow both in office and onsite.

Our platforms

Purpose-built for the way your work is actually done.

Thirty-five years working with play and parks managers, tree officers, and cemetery teams. The product knows what you need to record, and why.

Playgrounds

Inspections fully aligned to ASTM standards, F1487, F2373 and CPSC with intelligent, report-ready workflows.

Parks & Open Spaces

Inspect and manage parks assets from bins to benches and paths to signage for improved public safety and site conditions.

Cemeteries

Complete graveyard site and memorial plot management, including stability testing for full traceability of sensitive sites.

Trees

End-to-end tree surveying, risk assessment and maintenance tracking for living assets.

Biodiversity

Record habitat surveys, calculate BNG units and support biodiversity planning with confidence.

Why organizations choose PlaySafe

Built for the people responsible for public assets, since 1989, with roots as a family business, we combine personalized service with streamlined processes and professionalism.

That's still how we work.

Practical support and continuous development

- Same day response and technical support
- Dedicated account management
- Training and implementation support
- Customer-led development and regular system updates
- Logged and prioritized issue tracking
- Available via an Annual licence or PAYG basis

Trusted by teams.
