Dental Implant Uses

Removable Dentures

The replacement of a full set of teeth per jaw with removable teeth. Held in by suction and adhesive if needed

Implant Supported Dentures

The replacement of a full set of teeth per jaw with removable teeth. Held in by dental implant attachments

All on X - fixed teeth

The replacement of a full set of teeth per jaw with removable teeth. Screwed into dental implants providing fixed teeth

" I was absolutely terrified of the dentist with many awful past experiences. This man has literally changed my life. The care and detail is beyond anything I could imagine. Full set of implants with the most amazing smile. Dr Waghela and his wonderful team are with you every step of the way. I honestly cannot recommend them highly enough.
Thank you from the bottom of my heart."

Vanessa DeVivian

" Right from the beginning I felt confident in Natural Smiles Corby. They were recommended to me and I would recommend them to anyone. The staff are confident, friendly and professional throughout my treatment. Which finished today"

Glenn Lumsden

" Having spent most of my lifetime in a dental practice, I was apprehensive when I needed private treatment for some dental implants to replace quite a few missing teeth. Dr Bhavnish has been nothing but amazing! He explained the process thoroughly, addressed any concerns and made sure I was comfortable throughout the whole procedure. The aftercare has been fabulous too. I would recommend him and his practice with my eyes closed."

Bindi Patel

Dental Implant Benefits

Fixed teeth

The replacement of missing teeth with fixed teeth that do not need to be removed, glued or are bulky

Improved Oral Health

Procedures involved in a smile makeover can contribute to better oral hygiene. This can lead to less dental problems

Positive Impact on Overall well being

An improved smile can have a positive impact in mental and social well being.

Dental Implant Process

Planning

Detailed 3D planning using CT scans,
3D scans of the teeth/ gums &
for meticulous detail

Surgical Phase

The implant(s) is placed with precision. At times, we combine teeth removal and implant surgery into one visit. Temporary teeth are provided for cosmetic areas

Healing

The dental implant(s) are allowed to integrate with your bone for 3 to 6 months.

Final Fitting

The final tooth/teeth are fitted after the healing phase
