

Medically Necessary Contact Lenses (MNCL) Reimbursement Program

Support members with complex vision needs through a simple reimbursement program — up to \$1,000 per year

XP Health offers a dedicated reimbursement program for members who need medically necessary contact lenses (MNCL). If a member has a qualifying vision condition — such as a very high prescription or keratoconus — they can get reimbursed for their fitting exam and lenses, up to \$1,000 per year, once they submit the required documentation. This ensures members have access to the specialized contacts they need for clear, healthy vision, even if they aren't available through the XP Store.

How it works

1

Qualify

Member is diagnosed by their provider with a qualifying medical eye condition (e.g., keratoconus, very high prescription).

2

Visit

Member works with their provider to get fitted and purchase lenses.

3

Submit

Member sends receipt, chart notes, and a short XP Health verification form.

4

Reimburse

XP Health reimburses up to \$1,000 per member per year.
