Forward Looking Statements & Disclosures

TSXV:CTM

This presentation was prepared by management of Canterra Minerals Corporation (“Canterra” or the “Company”). The information contained in this presentation (a) is provided as at the date hereof, (b) does not purport to contain all the information that may be necessary or desirable to fully and accurately evaluate an investment in Canterra, and (c) is not to be considered as a recommendation by Canterra that any person make an investment.

Canterra cautions all statements (including any oral commentary that may accompany this presentation), other than statements of historical facts, contained in this presentation and attributes of the Wilding Lake project; the business and operations of the Company, including future results of operations or financial condition, prospects, business strategy and plans and objectives of management for future operations, and other prospective transactions and their terms disclosed herein and the pro forma details of the Company post-closing of all prospective transactions, are forward-looking statements.

The words “believe,” “will,” “may,” “estimate,” “continue,” “projection,” “anticipate,” “intend,” “should,” “plan,” “expect,” “predict,” “could,” “potentially” or other similar expressions are intended to identify forward-looking statements, although not all forward-looking statements contain these identifying words.

Actual results and trends in the future may differ materially from those suggested or implied by the forward-looking statements depending on a variety of factors, including market prices, potential environmental issues or liabilities associated with exploration, development and mining activities, exploration and exploitation successes, continuity of mineralization, uncertainties related to the ability to obtain necessary regulatory approvals, permits, licenses and title and delays due to third party opposition, changes in and the effect government policies regarding mining and natural resource exploration and exploitation, continued availability of capital and financing, and general economic, market or business conditions. The forward-looking statements contained in this presentation speak only as of the date the statements are made and are based on information available to the Canterra at the time those statements are made and/or management's good faith belief as of that time with respect to future events. Such statements are based upon the current beliefs and expectations of Canterra's management and are subject to significant business, social, economic, political, regulatory, competitive and other risks, uncertainties, contingencies and other factors. Many assumptions are based on factors and events that are not within the control of Canterra. Actual future results may differ materially from historical results or current expectations.

These risks, uncertainties and assumptions could adversely affect the outcome and financial effects of the plans and events described herein. In addition, even if the outcome and financial effects of the plans and events described herein are consistent with the forward-looking information contained in this presentation, those results or developments may not be indicative of results or developments in subsequent periods. Although Canterra has attempted to identify important risks and factors that could cause actual actions, events or results to differ materially from those described in forward-looking information, there may be other factors and risks that cause actions, events or results not to be as anticipated, estimated or intended. Forward-looking information contained in this presentation is based on Canterra's current estimates, expectations and projections, which Canterra believes are reasonable as of the current date. Canterra can give no assurance that these estimates, expectations and projections will prove to have been correct. You should not place undue reliance on forward-looking information, which is based on the information available as of the date of this presentation. Forward-looking information contained in this presentation is as of the date of this presentation and, except as required by applicable law, the Company assumes no obligation to update or revise them to reflect new events or circumstances. Historical statements should not be taken as a representation that such trends will be replicated in the future. No statement in this presentation is intended to be nor may be construed as a profit forecast. Additional information related to Canterra, including risks and uncertainties, can be found on its SEDAR profile at www.sedar.com.

The technical information contained in this corporate presentation has been reviewed and approved by Christopher Pennimpede, P.Geo. and President & CEO of Canterra Minerals Corporation. Mr. Pennimpede is a “Qualified Person” as defined by National Instrument 43-101, Standards of Disclosure for Mineral Projects.

Resource Disclosures

Lundberg Mineral Resource Estimate is based on \$20 US/t NSR cutoff from the technical report entitled “NI 43-101 Technical Report and Mineral Resource Estimate on the Lundberg Deposit, Buchans Area, Newfoundland and Labrador, Canada”, and dated April 15, 2019, was prepared by: Michael Cullen P. Geo., Matthew Harrington, P. Geo., and Shaun O'Connor, P. Geo. Figures have been rounded to reflect the relative accuracy of the estimates. Mineral resources are not mineral reserves and do not have demonstrated economic viability.

Bobby's Pond Mineral Resource Estimate is based on a 1.0% CuEq cutoff from the technical report entitled “Technical report on the Bobby's Pond CU-ZN deposit, Newfoundland and Labrador, Canada” prepared for Mountain Lake Resources Inc., report date: July 31, 2008, as prepared by RPA. Mineral resources are not mineral reserves and do not have demonstrated economic viability.

The Daniel's Pond resource estimate is based on a 2% Zn cutoff from the technical report entitled “Revised Technical Report on the Daniels Pond Deposit and Property Holdings of Royal Roads Corp. Red Indian Lake Area, Newfoundland, Canada” prepared for Royal Roads Corp., Effective Date: April 29th, 2008, as prepared by Mercator Geological Services. All figures have been rounded to reflect the relative accuracy of the estimates.

The Tulks Hill resource estimate is based on a 1.1% Cu Equivalent cutoff grade the technical report entitled “Technical Report on the Tulks Hill Cu-Zn Project, Newfoundland and Labrador, Canada” prepared for the Tulks Hill Joint Venture between Prominex Resources Corp. (Operator) and Buchans River Limited as prepared by Hryar Agnerian of Scott Wilson Roscoe Postle Associates Inc. All figures have been rounded to reflect the relative accuracy of the estimates.

The Lemarchant resource estimate is based on the NI 43-101 technical report entitled “NI 43-101 Technical Report and Updated Mineral Resource Estimate on the Lemarchant Deposit South Tally Pond Property, Central Newfoundland, Canada” prepared for NorZinc Ltd., Report Date: October 22, 2018, Effective Date: September 20, 2018, as prepared by Michael Cullen, P. Geo., Matthew Harrington, P. Geo. and Michael J. Vande Guchte, P. Geo. The report is available on the Company's website at www.canterraminerals.com

The Boomerang and Domino resource estimates are based on the NI 43-101 technical report entitled “Messina Minerals Inc.: Tulks South Property, Central Newfoundland, Canada Technical Report” prepared for Messina Minerals Inc., Report Date: August, 2007, as prepared by Snowden. The report is available on the Company's website at www.canterraminerals.com

Gross value, Zinc and Copper Equivalent, Precious Metals Equivalent calculated at the following metal prices in US dollar: \$1.26/lb Zn, \$0.97/lb Pb, \$4.32/lb Cu, \$29.48/oz Ag, \$2323.16/oz Au as of 2024-06-19. Copper and Zinc Equivalent is calculated by taking the amount of each metal in the deposit, multiplying it by its respective price, then dividing by the price of zinc to get a zinc-value equivalent. This sum is then normalized by the zinc price to convert the combined metal values into their zinc equivalents. $Zn\ Eq = (Metal\ Quantity \times Metal\ Price) / Zinc\ Price$. $Zn\ Eq\ \% = (Total\ Zn\ Eq\ in\ million\ lbs \times 1,000,000 / Pounds\ per\ long\ ton) / Total\ tons$

The Long Lake resource estimate is based on the NI-43-101 technical report entitled “Independent Technical Report for the Main Zone of the Long Lake Volcanic Massive Sulphide Project, Newfoundland and Labrador, Canada” prepared for Messina Minerals Inc., Report Date: April 16, 2012, Effective Date: March 13, 2012, as prepared by SRK Consulting (Canada) Inc. The report is available on the Company's website at www.canterraminerals.com

Inferred mineral resources are considered too speculative geologically to have the economic considerations applied to them that would enable them to be considered for estimation of mineral reserves, and there is no certainty that inferred mineral resources will be realized. Combined total Indicated & Inferred resources (added Inferred & Indicated) are not NI-43-101 compliant. Historic resources are not to be considered NI-43-101 compliant.

Newfoundland: The Best Canadian Mining Jurisdiction

FASTEST PATH TO PRODUCTION

A proven track record of speed

- Valentine Gold Mine: discovery to full commercial production in just 4 years — now Canada's largest gold mine
- Hammerdown Mine: environmental review and permitting cleared in ~ 2 years to reach production
- Firefly Metals' Green Bay Copper Project: environmental review cleared in just 45 days

GENERATIONAL MINING CULTURE

A generational mining workforce

- ▶ Mining heritage dating back to the historic Buchans Mine(1920s)
- ▶ Deep, experienced workforce — many fly-in/fly-out to mines elsewhere in Canada and want high-paying jobs that keep them on the Rock
- ▶ Ranked 14th globally for mining investment
- ▶ Skilled labour and barriers to development as low as we've seen in decades

BUILT-IN INFRASTRUCTURE

Roads, power and people already in place

- ▶ Extensive road network and grid power already reach across central Newfoundland
- ▶ Established communities and skilled trades located close to every major project
- ▶ Far lower capital and time required to bring a deposit into production

Investment Highlights

✓ FOUNDATION OF A DEVELOPER

Second-largest critical minerals resource in Newfoundland. We control the Buchans district, 7 deposits & a growing pipeline of targets directly adjoining Equinox Gold's new Valentine mine.

✓ UPSIDE OF CONSOLIDATION

26Mt¹ Critical Mineral resource base and growing in a Tier 1 Jurisdiction with excellent infrastructure. Consolidation of all known deposits for the first time.
Exploring the District as one project

✓ SUPPORT

Major shareholders : Eric Sprott (4%), Michael Gentile (5.8%)

✓ CATALYSTS

Fully funded 15,000m Drill Program building on 2025 drilling successes including :

- 31.5m @ 10.89 g/t Au
- 68.0m @ 1.0% CuEq

✓ GOALS

- Continue to grow our anchor resource(Lundberg).
- Demonstrate satellite deposits can grow and identify a pipeline of targets across the district

Management & Board Of Directors

Chris Pennimpede, P.Geo
CEO and Director

- 19 years of exploration experience
- VP Corp Dev Contact Gold
- Underworld/Kinross
- Prosperity Goldfields/Northern Empire

Paul Moore, P.Geo, M.Sc
VP Exploration

- More than 30 years of exploration experience focused in Eastern Canada
- Former Senior Geologist at Teck Corporation and Anglo American
- Board Member, Mining NL

Joanne Kearney, B.Sc
Director

- 20 years experience advising Canada's mining and capital markets industries, with a focus on transactional communications, corporate affairs and crisis management

Andrew Farncomb, B. Comm
Director and Chairman

- Director at Northern Superior Resources sold to IAMGOLD for \$267M in 2025
- Founder and Managing Partner of Cairn Merchant Partners LP
- Former Partner at Paradigm Capital Inc.

Matthew Manson, PhD, P.Geo
Director

- President & CEO, Radisson Mining Resources
- Former CEO, Marathon Gold (led Valentine from exploration through development/construction; merged with Calibre Mining)
- Northern Miner Mining Person of the Year (2017); PDAC Viola MacMillan Award (2015)

Josh Serfass
Director

- Vice President of Corporate Development Integra Resources
- Former Strategic Advisor at VRIFY
- Former Manager of Corporate Communications Integra Gold; sold to Eldorado Gold for \$600M in 2017

Nicklas Coleman, B.Comm
Director

- Founder and Co-Owner of Coleman Brothers Investments
- Former VP, Director and Investment Counsellor – BMO Private Banking
- Honors Bachelor of Commerce, Smith School of Business at Queens University

David J. Butler, P.Geo
Exploration Manager

- More than 30 years of exploration experience, primarily in Newfoundland-based VMS assets
- Board Member, Professional Engineers and Geoscientists of Newfoundland and Labrador

Konrad Chrzastowski, P.Geo, M.Sc
Corporate Development

- Exploration experience across multiple deposit types from Diamonds to Porphyry Copper across Canada and the USA
- Masters focused on platinum/palladium ore deposits – Stillwater complex, Montana

A wide-angle photograph of the Buchans mine site. In the foreground, a large, deep, blue body of water, likely a tailings pond, occupies the lower half of the frame. The water's surface is calm, reflecting the clear blue sky. Behind the water, a steep, rocky embankment rises, showing signs of erosion and mining activity. At the top of this embankment, several industrial buildings are visible. On the left, there are smaller, white, rectangular structures. In the center, a tall, dark, lattice-structured tower, possibly a headframe or ventilation shaft, stands out against the sky. To the right of the tower, there are more large, white industrial buildings. The background shows a flat, open landscape under a vast, clear blue sky with a few wispy clouds. The overall scene depicts a large-scale industrial mining operation in a natural setting.

Buchans

Buchans Project – Undeveloped and Historical Deposits

**Historic production¹ (1928-1984) – 16.2 Mt >23% Cu+Pb+Zn
(14.5% Zn, 7.6% Pb, 1.3% Cu, 1.37 g/t Au & 126 g/t Ag)
Closed due to exhaustion of reserves**

Buchans Project – Lundberg Long Section

Highlights

- Substantial Metal Inventory
- Near-surface potential open pit development
- Last two years of drilling have demonstrated potential for significant resource growth
- Based on 2019 metal prices \$1.20 US/lb Zn, \$1.00 US/lb Pb, \$3.00 US/lb Cu, \$1250 US/oz Au, and \$17 US/oz Ag.
- Two Level high grade zone open in multiple directions, intercepts include
 - 5.5m @ 6.77% CuEq (1.05% Cu, 7.17% Zn, 4.63% Pb, 140.04 g/t Ag & 0.88 g/t Au)

Timelines & Catalysts

PHASE 1

Anchor deposit. Grow tonnes at Lundberg.

PHASE 2

Growth pipeline. Multiple opportunities to add tonnes beyond Lundberg across the satellite deposits.

Q1 2026

- Resource extension drilling - Demonstrate the anchor deposit can grow substantially

- Resource drilling results continue to show systematic deposit growth

Q2 2026

Q3 2026

- Drilling final resource expansion at anchor deposit
- Drill startup at the growth pipeline – multiple opportunities to add tons beyond Lundberg across the satellite deposits

Q4 2026

- Canterra's maiden resource estimate

Appendix

World-class Technical Advisors

Phil Smerchanski, M.Sc, P.Geo
Lead Technical Advisor

- Over 23 years of experience in magmatic nickel sulphide and orogenic gold exploration
- Has held technical and executive roles with Oxygen Capital, Anglo American, INCO and Falconbridge

Matt Penny, P.Geo
Geophysics

- More than 20 years of worldwide exploration experience
- Glencore, AngloAmerican and Lundin Mining

Stephen Piercy, PhD, PGeo
VMS

- Head of the Piercy research group at the Department of Earth Sciences at Memorial University
- Specializes in VMS deposits in central Newfoundland

Rodney Allen, PhD
VMS

- 42 years experience in mineral exploration and research applied to mineral exploration.
- Former Principal consultant to Boliden Group

Neal Reynolds
Technical Advisor

- 40+ years experience in mineral exploration and structural geology
- Director and Principal Consultant at CSA Global/ERM
- Global expertise across various deposit types

A photograph of a cleared hillside, likely a construction or logging site. The foreground is dominated by large, light-colored, layered rock formations. The ground is covered with loose rocks, debris, and sparse vegetation. In the background, a dense forest of evergreen trees is visible. Several pieces of heavy machinery, including an excavator and a bulldozer, are positioned on the hillside. The sky is overcast and grey.

Wilding

Growth Pipeline – Lemarchant - EM

- Room to discover >5Mt Duck Pond like deposit
- Many near resource opportunities to grow current resource base – drilling in 2026
- Consolidated EM across many previous operators and owners have yielded many new targets that are currently being ground truthed, several have the same signature as Lemarchant /Duck Pond in EM and geochem- 2026 will test the highest confidence targets
- Goal to discover new 5 Mt orebody with Duck Pond/Lemarchant grades

A Major Player In Canada's Next Gold Mining Camp

- Equinox and Eldorado aggressively entering emerging gold district
- Canterra well positioned since 2021
- Valentine Lake Shear gold corridor central to CTM's properties
- Same key host lithologies, mineralization style, and structural setting
- Directly on strike with Valentine Mine
- Numerous high-grade occurrences and till anomalies on the key shear and splays
- High grades in initial scout drilling on Canterra's property

➤ CANTERRA

- Buchans
- Equinox Gold
- Eldorado Gold
- Canterra Minerals
- Gold Occurences
- Gold-Bearing Structure

Wilding Project Highlights – 2025 Program

- 1,243m of drilling completed in Q4 2025
- Step out drilling building on the original discoveries and 2025 prospecting

Buchans Project – Targets & 2025 Drill Results

✓ **Road Accessible Year Round**

Copper projects tied to power grid gold projects 50 km from Millertown, 30km from former Duck Pond mine and powerlines, extensive network of well-maintained logging roads and adjoins Equinox's Mine road

✓ **Regional Infrastructure Support**

Equinox Gold and NL Hydro advancing power, road access and infrastructure. Regional highway upgrades by province planned.

✓ **Tier 1 Jurisdiction**

Safe, stable, rule-of-law jurisdiction mining history and established permitting processes with recent permitting success of Equinox's Valentine mine from discovery of resources to construction and production in Q3 2025

✓ **Experienced Local Work Force and Community Support**

Home to a large workforce of local resource industry professionals with multi generational mining heritage

Buchans – 2025 Drilling Highlights

2025 Highlights

- ~8600m drilled at Buchans
- Lundberg mineralization expanded
- Several prospects tested
- Buchans Horizon intersected at Nu and staking of new prospective trend

Buchans - Mine Trend Deep - Section 507500E – Western limit of previous mining

Buchans Project – Expansion and Structural Upside

Canterra Minerals Expansion

- 13.5 km² land expansion to the south, covering an underexplored, prospective ore
- Close proximity to the Buchans Ore Horizon, a key control on the historically mined Buchans deposits
- Structurally complex thrust-fault terrain with stacked thrust panels that can repeat/offset horizons and create multiple VMS lens targets

Canterra Minerals Expansion 2026 Plan

- Geophysics IP and EM over prospective horizon (Q1-Q2)
- Follow-up drilling along prospective Buchans Horizons(Q2-Q3)

Buchans Project -2026 Targets

Multiple targets across a large property

- Extensions &/or repeats of Buchans Ore horizon - under explored areas away from the historic mining operations
- Depth potential in areas adjacent to historical mining – *Mine Trend*
- Potential for expansion of exiting resource - could contribute to new mine development - *Lundberg/Two Level*

Buchans Sandfill Target – Untested Deep 3DIP Anomaly / Prospective Area

**Chargeability Anomaly
Possible Ore Trend
(untested)**

- Historic Surface Collar
- Historic Underground Collar
