KIT for Automotive

IT and Security for Businesses Running Autopart

Automotive parts businesses depend on reliable systems across trade counters, warehouses and offices.

Autopart manages stock, orders and invoicing. The surrounding IT environment – devices, email, security and backup – must operate just as reliably.

KIT ensures the systems supporting Autopart are secure, monitored and supported together.

The Automotive IT Challenge

Trade counter PCs handle high volumes of transactions during business hours.

Warehouse systems manage parts movement and stock control. Office teams rely on email and financial systems.

When IT support and ERP expertise are separated, maintaining consistency across these environments can become more difficult.

KIT provides integrated support across the full environment.

ERP: Autopart

What You Get

+ Trade counter devices patched outside trading hours.
+ IT teams familiar with Autopart environments.
+ Email protection against phishing and invoice fraud.
+ Device management across multiple branches.
+ Microsoft 365 identity monitoring.
+ Security coverage for both counter and back-office devices.
+ Microsoft 365 backup and recovery.
+ Help desk support familiar with automotive parts operations.

KIT Managed – Your Complete IT

Feature	Entry Mobile	Entry	Core	Secure+
Ideal for:	Mobile-only staff - drivers, delivery, yard - whose primary device is a phone or tablet.	Desk-based staff needing a managed, secured PC with core endpoint protection and backup.	The standard choice. Ideal for most branch, warehouse and office teams, providing full device lifecycle and phishing training on top of Entry.	Businesses with regulatory, insurance or higher-security requirements (SIEM, advanced email, compliance-grade).
Microsoft 365 licence	Basic	Business Premium	Business Premium	Business Premium
Device management	Mobile only	Patched & monitored	Full lifecycle	Full lifecycle

Endpoint ransomware / malware protection	–	✓	✓	✓
M365 data backup	–	✓	✓	✓
24/7 managed threat detection	–	✓	✓	✓
Staff phishing training	–	–	✓	✓
Managed SIEM	–	–	–	✓

KIT Protect — Security That Sits Alongside Your IT

Feature	M365	Protect	Protect+
Ideal for:	Businesses whose IT is already managed (internally or by another provider) that want Klipboard to specifically secure and audit their Microsoft 365 tenant.	Businesses with IT already in place that need a full security layer added - endpoint, email, backup, 24/7 monitoring.	Businesses with IT already in place that need regulated-grade security (SIEM, advanced email, SAT, quarterly reviews) without switching IT provider.

Why KIT for Automotive

+ **Autopart expertise**

  Our teams understand the ERP systems automotive businesses rely on.

+ **Trade counter awareness**

  Updates and maintenance scheduled around trading hours.

+ **Multi-branch support**

  Consistent device management across locations.

+ **Single provider model**

  IT and ERP knowledge delivered through one team.

34,635 ERP customers globally.

3,500 users already under KIT management.

The average cost of a compromise exceeds £120,000 – Automotive parts businesses processing high-volume invoices are prime targets for payment redirect fraud.

The median time to click a phishing link is under 60 seconds – Counter staff processing urgent orders are exactly the people attackers target.

Speak to your Account Manager to get a proposal for your automotive business.
