# CASE STUDY

## HOW STANDVAST TRANSFORMED ITS BUSINESS WITH NETSUITE

### COMPANY OVERVIEW

Client: Standvast ([www.standvast.com](http://www.standvast.com))

Industry: E-commerce Fulfillment and Supply Chain Solutions

Head Office: Washington, D.C.

### THE CHALLENGE

Standvast was outgrowing its outdated accounting system. Manual workflows, disconnected platforms, and limited automation made it difficult to manage high-volume orders, track inventory, and optimize logistics. Without real-time visibility or accurate reporting, operational decisions were delayed and inefficient. As the company scaled, the system struggled to keep up, putting pressure on both performance and customer satisfaction.

## THE SOLUTION

NetSuite offered the unified, cloud-based platform Standvast needed. It automated key workflows, integrated disconnected systems, and gave teams instant access to operational and financial data. The platform's flexibility allowed for scalable growth, streamlined collaboration, and faster, smarter decision-making across the organization.

## PARTNERING WITH CEBA

CEBA Solutions led the NetSuite implementation with a hands-on, tailored approach. Their deep experience in e-commerce and logistics ensured that the setup aligned with Standvast's operations. CEBA provided clear onboarding, staff training, and post-launch support, all while minimizing disruption and delivering long-term value.

## RESULTS & BENEFITS

Since the move to NetSuite, Standvast has seen faster order fulfillment, reduced shipping costs, and more accurate inventory control. Teams now operate with better data, less manual work, and greater confidence. Most importantly, the business is ready to scale efficiently without compromising service.

## KEY FEATURES & MODULES IMPLEMENTED

### Financial Management

Improved reporting and automated accounting

### Inventory Management

Real-time tracking and smarter restocking

### Order Management

Faster, more accurate order processing

### Warehouse Management (WMS)

Streamlined picking, packing, and fulfillment

### Supply Chain Management

Greater visibility and supplier coordination

## CONCLUSION

With NetSuite and CEBA Solutions, Standvast transformed its operations from fragmented and manual to streamlined and future-ready. The unified system improved efficiency, strengthened decision-making, and empowered growth—laying the foundation for long-term success in a competitive, fast-paced industry.
