Ethovance™ 1000

Advanced Polymeric Dispersant for
High-Performance Pigment Dispersions

Designed for efficiency. Engineered
for consistency.

*Advanced Chemistry.
Invented Together.*

Ethovance™ 1000 Hyperdispersant

Designed for efficiency. Engineered for consistency.

ETHOVANCE™ 1000 is a next-generation polymeric dispersant developed for demanding water-based coating, ink, and pigment dispersion systems. It delivers excellent pigment wetting, dispersion stability, and long-term performance without compromising formulation flexibility.

Product Specifications

Product	Description	Active Content	Color APHA	Appearance	pH	Solubility
Ethovance 1000	Polymeric Hyperdispersant	32%	<300	Colourless to Pale Yellow	6.0 - 8.0	Soluble

Key Features

- Improved dispersion efficiency
- Enables faster pigment wet-out and reduced milling time
- Enhanced color strength
- Supports higher tinting strength and improved shade clarity
- Excellent storage stability
- Helps maintain dispersion quality over time
- Broad pigment compatibility
- Effective with TiO₂, carbon black, and organic pigments

Applications

- Decorative & industrial water-based paints
- Pigment concentrates & universal colorants
- Water-based inks & OPVs
- Construction coatings & functional dispersions
