

The intelligent interbank trading venue.

IDBX Corporation is a financial market infrastructure company in London and New York, building the intelligent interbank trading venue. Banks and dealers trade rates, FX, bonds, money markets and tokenized assets on one platform, for a flat subscription rather than brokerage on every ticket. AIDANN, its governed intelligence layer, reads the book and the netting set and holds no permission to trade.

THE PLATFORM

NEXUS

One secure door into the whole venue.

BOND MATCH

Bonds matched between banks and dealers.

TOKENIZED

Tokenized assets on the same rail.

AIDANN

Governed intelligence at every step. It holds no permission to trade.

FX

Foreign exchange, priced and done on one screen.

SWAPS

Swaps ordered and confirmed in one place.

NETTING

Netting turns many payments into a few.

MODULES

One venue. Every module.

LEADERSHIP

Nicholas J Runcorn founded IDBX and leads it as Chair and Chief Executive. He has spent thirty four years in interbank markets, running rates, FX, bond and options desks in London, Madrid, New York and Nyon, and before IDBX built and led an FCA authorized hybrid MTF. At IDBX he leads the design of the venue with the IDBX engineering team.
