

LEXMEDICAL
Accessible Care. Stronger Communities.

Healthcare Shouldn't Depend on Where You Live

Expanding Access.
Strengthening Health Systems.

DIGITAL CARE

Consult a doctor
from anywhere.

COMMUNITY CONNECT

Healthcare through
trusted local networks.

STRONGER SYSTEMS

Building resilient
health infrastructure.

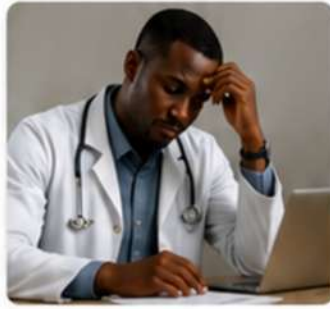

Expanding Access Remains One of Healthcare's Greatest Challenges

Distance to Care

Patients often travel long distances to access basic healthcare services.

Workforce Constraints

Healthcare professionals remain concentrated in urban centres.

Infrastructure Gaps

Many communities lack access to structured outpatient healthcare services.

Affordability Barriers

Cost and accessibility continue to delay care seeking and treatment.

The LexMedical Approach

Expanding access through technology, community networks and healthcare infrastructure.

Digital Clinics
Access care securely from anywhere, anytime.

Specialists & Referral Networks
Access to expertise when and where needed.

Community Health Access
Care closer to home through trusted community networks.

Smart Outpatient PHC
Rapidly deployable, technology-enabled primary healthcare infrastructure.

CareKconnect

One platform connecting patients, communities, providers and institutions through multiple pathways to care.

Digital Clinics
Care at your fingertips, anytime, anywhere.

Community Health Access
Bringing healthcare closer through trusted networks.

Smart Outpatient PHC
Modern, scalable and rapidly deployable.

One Platform. Three Pathways to Care.

Flexible healthcare access models designed for different populations, environments and healthcare needs.

01 Digital Clinics

Available Through Connected Devices

Virtual consultations, care navigation, electronic records, prescriptions and follow-up care.

Hospitals

Specialists

Employers

HMOs

02 Community Health Access

Healthcare Through Community Networks

Supporting health education, screening, referrals and access to licensed healthcare professionals.

NGOs

Governments

Development Partners

Humanitarian Programmes

03 Smart Outpatient PHC

Rapidly Deployable Healthcare Infrastructure

Technology-enabled outpatient care, diagnostics, maternal and child health, pharmacy support and telemedicine.

Governments

Development Partners

Communities

CSR Programmes

One ecosystem connecting patients, communities, providers and institutions.

Digital Clinics

Community Health Access

Smart Outpatient PHC

Flexible Partnership Models for Different Organisations

LexMedical can be deployed as a healthcare access platform, a community health programme, or healthcare infrastructure depending on organisational objectives.

01 Hospitals, Specialists & Provider Networks

Typical Applications

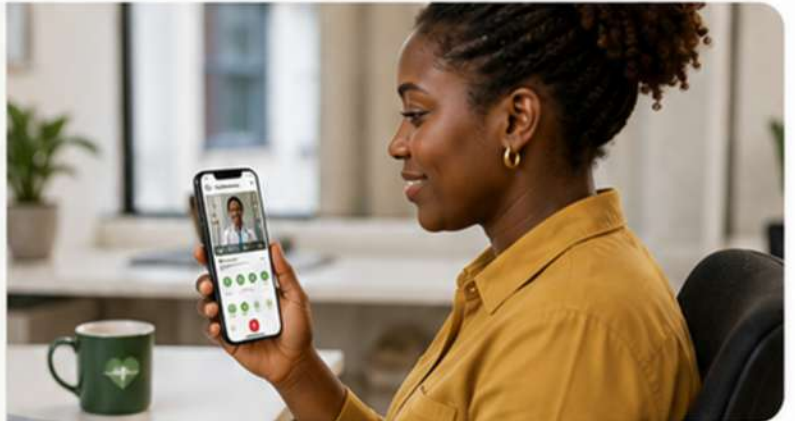

- ✔ White-labelled Digital Clinics

Next Steps

A simple pathway from interest to deployment planning.

01

Start a conversation

Tell us the population, community or institution you want to support.

02

Define the pathway

Identify the best model: Digital Clinics, Community Health Access or Smart Outpatient PHC.

03

Plan the deployment

Agree scope, governance, timelines and practical implementation steps.

Three pathways. One access mission.

Digital Clinics • Community Health Access • Smart Outpatient PHC

Digital Clinics

Care through connected devices.

Community Health Access

Care through trusted local networks.

Smart Outpatient PHC

Rapidly deployable healthcare infrastructure.

Healthcare shouldn't depend on where you live.

Expanding access. Strengthening health systems. Building healthier communities.
