Arkose Titan Platform

Arkose Titan is the only unified fraud prevention platform that protects your entire user journey — while making attacks unprofitable for bad actors.

The Problem with Traditional Fraud Prevention

Always one step behind sophisticated attacks

Security friction kills conversion and customer experience

Fraudsters walk away with revenue and reputation

Unprepared for AI-powered attacks and agentic automation

Comprehensive Protection — Secure Every Stage of the User Journey

01

Sign-Up Protection

Stop fraud at the source before it impacts your platform or downstream systems.

Fake Account Creation

SMS Toll Fraud (IRSF)

Bonus & Promo Abuse

Registration Evasion

Email & Phone Farming

02

Sign-In Security

Block credential attacks and unauthorized access while legitimate users sign in seamlessly.

Account Takeover (ATO)

Credential Stuffing

MFA Compromise & Phishing

Session Hijacking

Brute Force Attacks

03

In-Platform Defense

Secure ongoing activities and transactions throughout the complete user lifecycle.

Payment & Transaction Fraud

Scraping & Data Harvesting

API Exploitation

Inventory Hoarding

Loyalty Fraud & Content Spam

What Makes Arkose Titan Different

- 01** **Attack Economics Disruption** Make fraud financially unviable by exhausting attacker resources — not just blocking attempts.
- 02** **Unified Platform Intelligence** Risk signals shared across all touchpoints create compounding cross-stage protection.
- 03** **Advanced Challenge Technology** LLM-resistant, multimodal challenges that adapt in real time. Zero friction for legitimate users.
- 04** **24/7 SOC & ACTIR** Proactive monitoring and threat hunting — not on-call. Our experts adapt defenses around the clock.
- 05** **Data Transparency & Downstream Deterrence** 225+ risk signals per session shared with customers to power downstream decisioning — restrict credits, limit features, extend deterrence beyond the front door.

Platform Components:

Arkose Bot Manager Arkose Device ID Arkose Email Intelligence Arkose Scraping Protection Arkose Edge

Built for the Age of Agentic AI

Arkose Titan detects and classifies AI agents — stopping malicious automation while enabling legitimate use cases.
