ABOUT US

MediCampus Europeo Faculty, when tradition meets innovation and equality

The MediCampus Europeo (MCE) is a cutting-edge faculty based in Malta, aimed at creating value for society and contributing to its progress.

MCE was established with the mission of providing its students with all the knowledge and skills required in the field of medicine, through theoretical lessons, practical activities, and internships in top European hospitals, making a positive impact not only on people's health, but also on global well-being.

This goal is pursued through the highest standards of education and training across all disciplines. Indeed, MCE operates with full respect for equal opportunities, focusing on the right to healthcare, social justice, and teamwork.

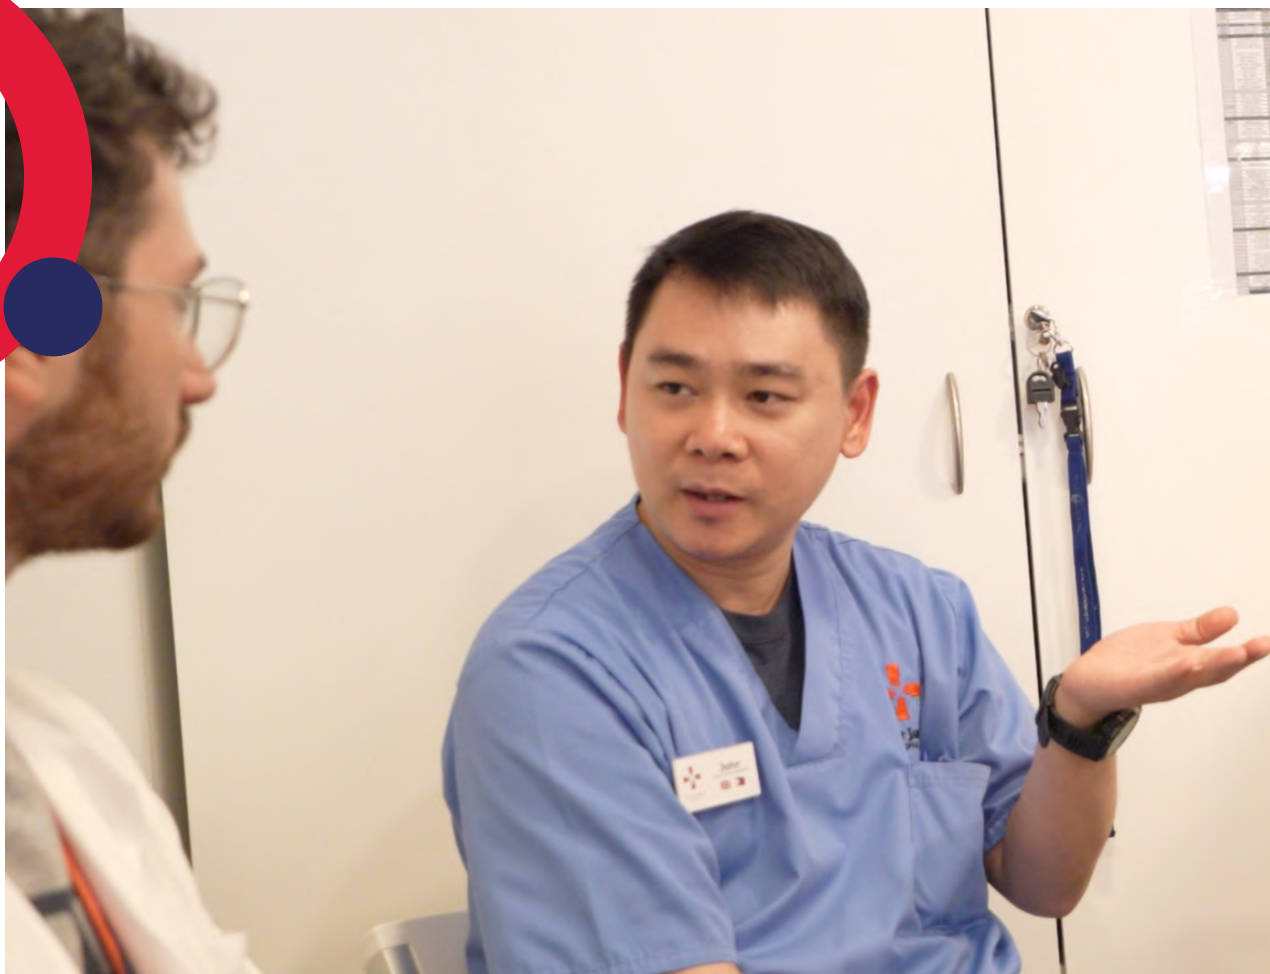

Through a meticulous evaluation of candidates' skills, aptitudes and motivation, MCE cultivates a diverse, highly motivated student body aligned with the University's values.

This process aims to identify and select those students who have the potential to become skilled professionals in their field, whose vocation is to improve the health and well-being of people around the world through research, innovation, and practice.

DEGREE PROGRAM

At MCE, you will **experience a global medical education with an international student body**, and benefit from a Faculty that boasts **high-profile experts** dedicated to teaching, and **develop essential skills through clinical practice starting from the first year.**

THE FACULTY OF MEDICINE

Our Faculty of Medicine combines high academic standards with a modern, student-focused approach.

The Degree Program in Medicine is taught in English by high-profile professors (360 ECTS, mandatory attendance). Graduates receive the title of Doctor of General Medicine (MD).

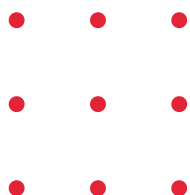

Duration: 6 years.

Students are immediately placed in a prestigious international environment where, in addition to basic theoretical subjects, they have the unique opportunity to engage in practical lessons from the first year and, starting from the third year, hospital internships in several teaching hospitals in Europe.

For many, studying Medicine is more of a calling than a choice.

At MediCampus Europeo, we aim to attract such students, those truly passionate about science, whose vocation is to improve the health and well-being of people around the world through research, innovation, and practice. You will experience a global medical education with an international student body, you will benefit from a Faculty of experienced professors dedicated to teaching and will develop essential skills through clinical practice starting from the first year to excel in the art of healing.

MCE offers its students a high-level practical and scientific education. Classes are taught by professors coming from some of the most renowned European universities, who follow a teaching method characterized by a close connection between theoretical and practical lessons.

The MediCampus Europeo and all its study programs are accredited by the Malta Further and Higher Education Authority (MFHEA) and it is under the Maltese Education Act. MFHEA is a full member of the European Association for Quality Assurance in Higher Education (ENQA).

Medical studies at MCE lead to a degree in Human Medicine, entitling graduates to obtain a license to practice throughout the EU and in many other countries, and it is fully equivalent to medical examinations and human medicine degrees from all other EU countries.

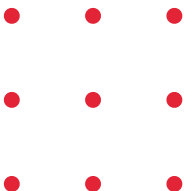

The degree in Medicine obtained at MediCampus Europeo holds great value, as our graduates receive a diploma issued by Trakia University.

The Medicine degree program at MediCampus Europeo is delivered in partnership with the renowned Trakia University, a state university located in Bulgaria which is one of the country's most famous universities.

It currently hosts approximately 10,000 students and includes 9 faculties, offering 43 bachelor's degrees, 71 master's programs, and 90 doctoral programs. Trakia University is accredited by the National Evaluation and Accreditation Agency (NEAA) under the Bulgarian Council of Ministers.

MCE adheres to the "Bologna Process" (European Higher Education System), using the SEIS European standards that define uniform education protocols for all European universities. Additionally, it employs the European Credit Transfer System (ECTS).

START OF THE ACADEMIC YEAR

The Academic Year 2027/28 for the
Faculty of Medicine will begin on
September 27, 2027

LOCATION

All theoretical and practical classes will
take place at the MCE Campus in Floriana,
Malta

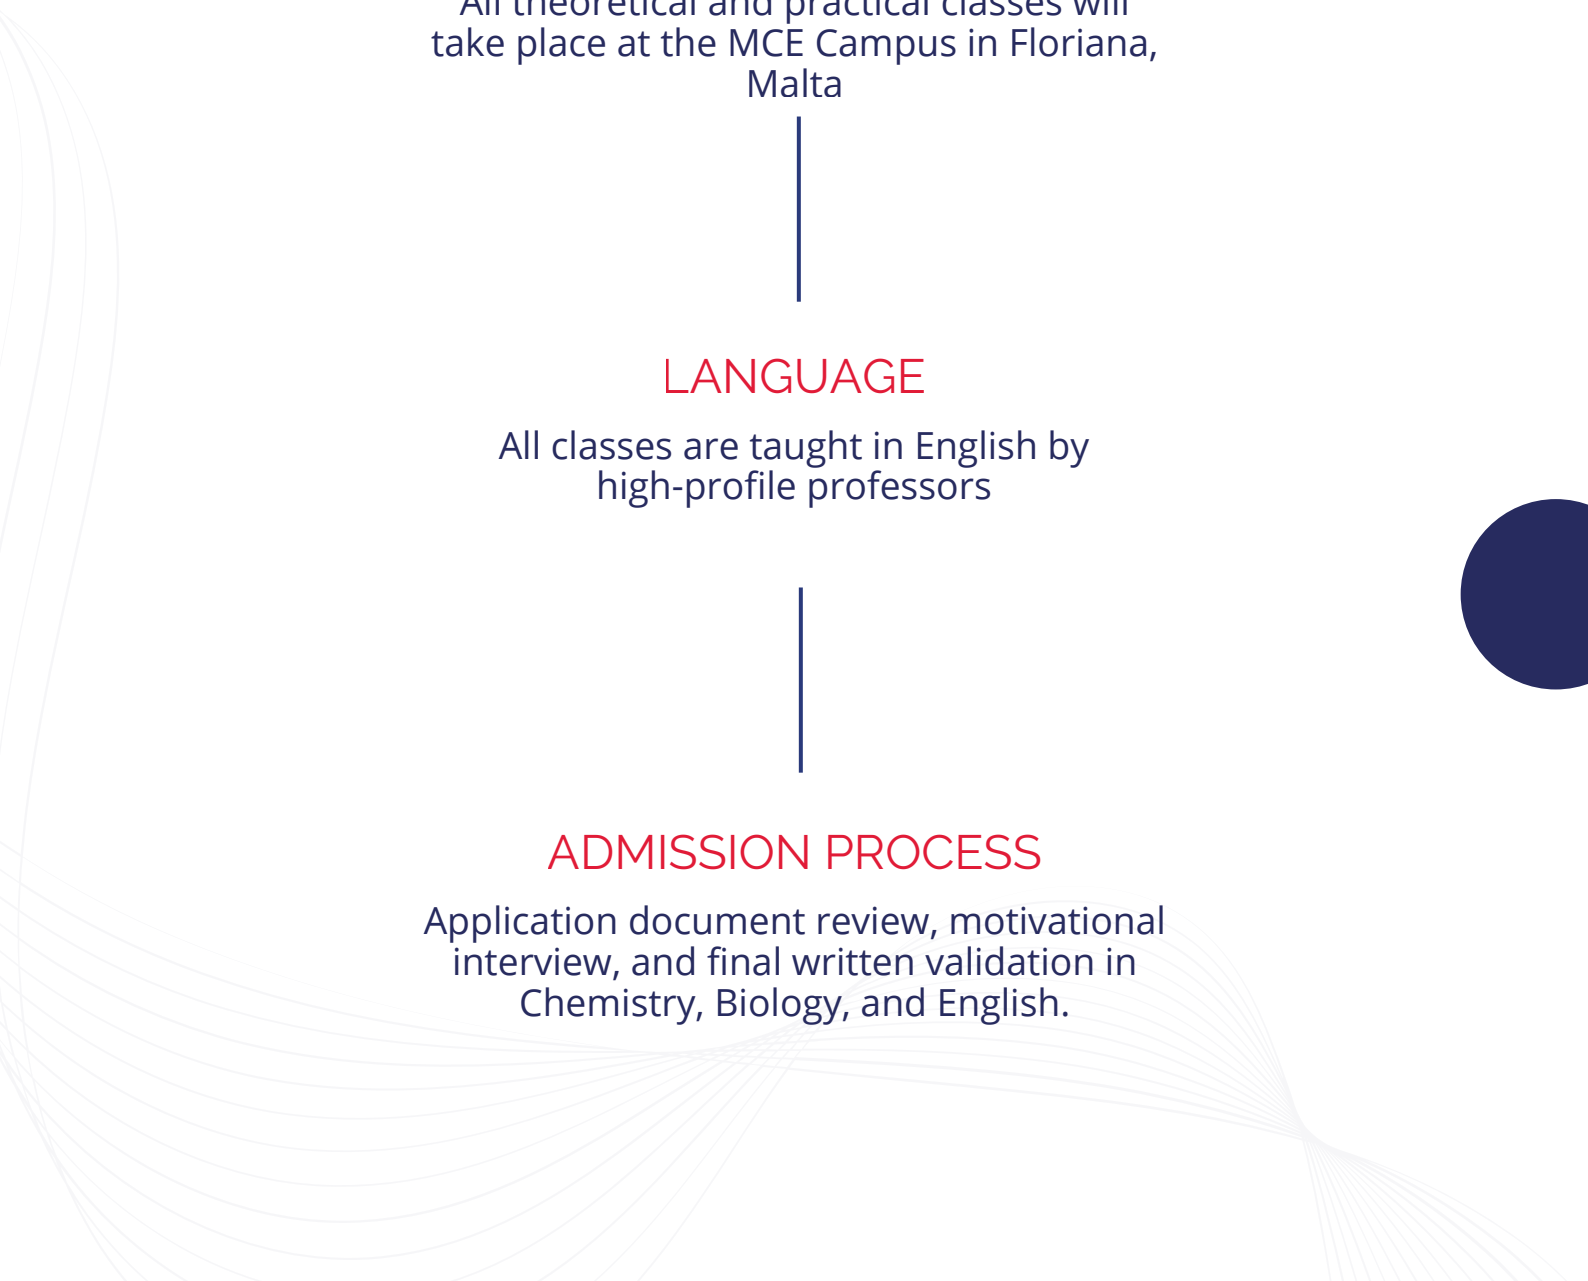

LANGUAGE

All classes are taught in English by
high-profile professors

ADMISSION PROCESS

Application document review, motivational
interview, and final written validation in
Chemistry, Biology, and English.

MCE TEACHING HOSPITAL NETWORK

MCE students have the opportunity to complete clinical placements within our network of partner hospitals, progressively moving from theoretical and pre-clinical learning into real healthcare environments.

Through these experiences, students gain direct exposure to patient care, a wide range of medical specialties, and the day-to-day practice of medicine under the supervision of experienced healthcare professionals.

UMBAL University Hospital “Prof. Dr. Stoyan Kirkovich”

Stara Zagora, Bulgaria

In Bulgaria, MCE has established a partnership with **UMBAL University Hospital “Prof. Dr. Stoyan Kirkovich”**, a multidisciplinary university hospital offering a broad range of medical, surgical and diagnostic specialties, where **MCE students can undertake clinical training from the 3rd academic year onwards.**

Its multidisciplinary setting gives students the opportunity to experience different areas of medical practice and understand how different specialties work together in the diagnosis, treatment and management of patients.

Brothers of Saint John of God – University Hospital

Bratislava, Slovakia

MCE has established a partnership with the **Ecclesiastic Order of the Brothers of Saint John of God (Brothers of Mercy)** to provide clinical internships at their University Hospital in Bratislava (Slovakia), part of one of the largest church-run hospital networks in the world.

With a medical tradition spanning centuries, the Order combines **professional healthcare with a strong commitment to patient-centred and compassionate care**. Its international network of hospitals and healthcare institutions provides a clinical environment shaped by extensive experience in medicine, education and assistance to patients.

Saint Michael's University Hospital

Bratislava, Slovakia

MCE also collaborates with **Saint Michael's University Hospital** in Bratislava, one of Slovakia's **modern and technologically advanced medical institutions**.

The hospital combines contemporary healthcare facilities, **advanced medical technologies and a wide range of specialised clinical services**, providing students with the opportunity to experience medicine in a modern and dynamic hospital environment.

An expanding international clinical network

MCE continues to expand its network of partner hospitals, with additional international internship opportunities being developed with university hospitals in **Italy, Germany and the Czech Republic**, including Prague and Brno.

Through this growing network, MCE aims to expose future doctors to different healthcare environments, medical specialties and approaches to patient care, adding an international dimension to their clinical education.

Early Clinical Exposure at Saint James Hospital Malta

From the 1st academic year, MCE students can have the opportunity to gain **non-curricular, on a voluntary basis, clinical exposure at Saint James Hospital in Malta**, complementing their academic studies with an early introduction to the hospital environment.

This early exposure helps students progressively develop professional awareness, confidence and a deeper understanding of the responsibilities involved in patient care, creating an important bridge between academic learning and their future clinical training.

MCE CAMPUS

MediCampus Europeo is the ideal place to live during your studies: it is a place to learn and grow alongside your classmates, fostering relationships that extend beyond the classroom walls.

The MCE Campus is located in the historic and well-known building “Casa Leone” in Floriana, just 800 meters from the capital, Valletta.

Malta International Airport, residential areas, and major hotels are all reachable within a ten-minute drive.

The MCE Campus covers a total area of approximately 1,300 square meters, spread over 5 floors, and offers welcoming and spacious facilities. In addition, a panoramic sea-view terrace is located on the rooftop.

Our modern Campus provides everything you need to succeed:

- 1,300 square meters Campus.
- Lecture Hall.
- Fully equipped classrooms and labs.
- Dedicated study rooms.
- Library and self-study area.
- Rooftop cafeteria with panoramic views.
- Malta International Airport is reachable within a ten-minute drive.
- Student services including academic tutoring and career support.

LABORATORIES & PRACTICAL TRAINING

At MediCampus Europeo, theory and practice go hand in hand. Our modern laboratories provide students with a safe, advanced, and collaborative environment where they can explore the foundations of Human Biology, Anatomy, Chemistry, Physics, and all the medical sciences.

Equipped with high-precision microscopes, anatomical models, and cutting-edge technology, each laboratory has been designed to stimulate curiosity and support an interactive learning experience. Students work in small groups under the supervision of qualified lecturers, gaining the confidence and technical skills needed for clinical practice.

From the first year of the Degree Program, every student has the opportunity to perform guided experiments and laboratory sessions that bridge classroom learning with real-world medical applications.

A modern campus where knowledge becomes practice, and practice becomes excellence.

MCE SUMMER DISSECTION WORKSHOP

MCE offers students the opportunity to take part in the **MCE Summer Dissection Workshop**, an **immersive hands-on experience designed to deepen the study of human anatomy through real cadaver dissection.**

Under the guidance of experienced anatomy professors, students can move beyond textbooks, digital models and traditional laboratory activities to observe and explore the human body directly. Through dissection, they are able to identify anatomical structures, understand their spatial relationships and connect theoretical concepts with real human anatomy.

A photograph of a dissection workshop in a laboratory. In the foreground, a student in a white lab coat is seen from the back, looking towards a group of other students. The students are gathered around a table where a human torso is being dissected. Various surgical instruments are laid out on a blue cloth-covered table in the lower right. The room has a tiled ceiling with fluorescent lights and a blue exit sign. The text is overlaid on a semi-transparent white box in the center of the image.

The workshop is designed to strengthen students' knowledge while developing important practical skills such as anatomical orientation, precision, observation and dissection techniques. Working directly with cadaveric specimens also helps students build a more advanced three-dimensional understanding of organs, tissues, muscles, vessels and anatomical regions.

This type of experience can be especially valuable for future clinical and surgical training, as it helps students better understand how anatomical structures relate to one another in a real human body rather than only through diagrams or models.

More than an additional summer activity, the **MCE Summer Dissection Workshop** represents an opportunity to approach anatomy in a deeper, more practical and memorable way, reinforcing one of the fundamental foundations of medical education through direct experience.

The background of the entire page is a photograph of a Maltese flag flying from a tall pole. The flag is white with a red cross in the center and a red saltire (St. Andrew's cross) on the left. Below the flag is a stone wall, likely part of a fortification, with a small lantern visible on the wall. The sky is a deep blue.

STUDYING IN MALTA

Malta has been a **member of the European Union since 2004** and is a **beautiful Mediterranean island** with a friendly and welcoming environment.

MCE offers you the opportunity to study at one of the best Faculties of Medicine in Europe with high-profile professors who teach at the most renowned universities in Europe.

What makes Malta an excellent destination for students is that, apart from being a very safe island, it offers a welcoming and English-speaking environment. According to Eurobarometer, 88% of the Maltese population speaks English. This makes Malta one of the most preferred destinations in Europe for studying English.

Malta is very well connected. The fastest way to reach Malta is by plane, with direct low-cost flights departing daily from all major European airports. Numerous other airlines, including **Ryanair, EasyJet, and Lufthansa**, also serve Malta International Airport.

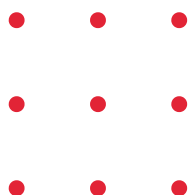

VALLETTA

Valletta is the most exciting and hospitable city to live and study in Malta. Energetic and diversified, Valletta boasts a large student population and a vibrant youth scene. The city is rich with restaurants, pubs, bars, museums, shops, sports facilities, and fitness centers. Numerous cinemas and shopping centers are just minutes away from the MCE Campus. Valletta has an active event calendar with concerts and festivals throughout the year.

WHY CHOOSE MEDICAMPUS EUROPEO?

- **Internationally Recognized Medical Degree**, automatically accredited across the EU, UK, Switzerland, Norway and beyond.
- **Hands-on Training from Year One**, with labs, clinical practice, and hospital internships in Europe.
- **English-Taught Program in a Global Environment**, with students from all over the world.
- **Malta, a safe, modern EU country with all the services of a major capital.**
- **Student-Centered Approach**, focused on motivation, personal growth, and continuous support.

BOOK A FREE ONLINE CONSULTATION

At MediCampus Europeo, we believe that choosing where to study medicine is a major life decision and we are here to help you make this decision with confidence. Our Student Office is always by your side, providing clear, honest, and personalized guidance throughout the process.

TUITION & LIVING COSTS

TUITION FEES

- €14,500/year – single installment (to be paid in September).
- €15,500/year – two semester installments (to be paid in September and in January).
- €500 Enrollment Fee (one-time fee, applicable only in the 1st year).

LIVING IN MALTA

- Average monthly cost: €800–€1,000 (accommodation, food, daily expenses).
- Affordable lifestyle in a safe, welcoming, student-friendly country.

APPLICATION PROCESS OVERVIEW

Applying to MediCampus Europeo - Faculty of Medicine in Malta is simple, transparent, and fully accessible online.

1. Online Application

Complete the online application form and submit your academic documents.

2. MCE Admission Assessment

A short online session (approx. 1 hour) including:

- Review of academic documentation
- Motivational interview

3. Conditional Offer

Applicants who successfully complete the Admission Assessment may receive a Conditional Offer of Admission.

4. Final Academic Validation

A formal academic validation conducted by the awarding university, Trakia University, confirming fundamental knowledge in:

- English (native speakers exempt)
- Biology
- Chemistry

5. Final Acceptance & Enrollment

Upon successful completion of the Academic Validation, applicants receive a Final Acceptance Letter and proceed with enrolment.
