Designed to help your body maintain a health inflammatory response while promoting overall wellness + recovery. This drip may help optimize wellness in the context of ongoing inflammatory stressors, including lifestyle-related or chronic inflammatory conditions.

ADVANCED + CUSTOM IV DRIPS

The following list of advanced IV protocols were created by our care team to address specific clinical needs. Your provider may recommend an advanced or custom IV protocol to enhance your larger care plan. Initial labs + ongoing lab monitoring is required for most of these drips.

- HIGH DOSE VIT C

Ascorbic Acid

Vitamin C plays an important role in supporting immune function, collagen production, + cellular health, making this drip a popular option for anyone looking to boost resilience + recovery as part of a balanced wellness routine.

- 15 gram \$240
- 25 gram \$260
- Custom high-dose Vit C or MISTLETOE IV prescribed in conjunction with integrative oncology care. Pricing varies.

- NAD+

Nicotinamide Adenine Dinucleotide, Amino Blend

NAD+ is a vital coenzyme found in every living cell, playing a key role in energy production, cellular repair, + metabolic function. This infusion is designed to support cellular health by helping replenish NAD+ levels which are essential for ATP production, DNA repair, + healthy aging processes. Ideal for anyone looking to support energy, mental clarity, + overall vitality as part of a comprehensive wellness routine.

- 250mg \$250
- 500mg \$425
- 750mg \$525

- PLAQUEX®

Phosphatidylcholine

Plaquex® is a phospholipid-based therapy designed to support cellular + vascular health. This infusion may help support lipid metabolism + optimal circulation and encourage overall cardiovascular wellness.

Plaquex® is often dosed in a series of infusions.

- \$240 per infusion OR
- \$2200 for a package of 10 infusions

- NIAGEN®

Nicotinamide Riboside, Amino Blend

Niagen® is a specialized form of Vit B3 that easily enters the cells + rapidly converts to NAD+, a coenzyme essential for cellular energy + repair. As NAD+ levels naturally decline with age, this infusion is designed to help support healthy aging, cellular energy production, + overall metabolic function. As compared to traditional NAD+ infusions, this IV can be completed in 60 minutes + has fewer side effects, making it ideal for supporting longevity, vitality, + cellular health.

- \$550/infusion
