

Profiles Explained

A product's "profile" refers to the design or cut made into the board that influences how it is attached and installed onsite. Carbon Smart Wood™ products are available in a number of different profiles based on their application.

Surfaced 4 Sides (S4S)

Material that is surfaced on all sides leaving the board with square edges.

APPLICATIONS

- Lumber & Trim

PROFILE VIEW

Eased 4 Edges (E4E)

Eased 4 Edges come with a 1/8" eased edge on all 4 corners

APPLICATIONS

- Decking
- Fencing

PROFILE VIEW

Hidden Fastener (HF)

Deck boards with a groove cut out along the long edge to seamlessly secure boards in place.

APPLICATIONS

- Decking

PROFILE VIEW

Tongue & Groove (T&G)

Material that is surfaced on all sides leaving the board with square edges.

APPLICATIONS

- Lumber & Trim

PROFILE VIEW

Tongue & Groove with Gap (T&G-G)

Deck boards with a tongue and groove of different sizes cut out of opposite edges to fit into each other in place while revealing a small gap where the boards meet.

APPLICATIONS

- Interior & Exterior Cladding

PROFILE VIEW

Shiplap (SL)

Deck boards with notches cut into the top and bottom of the edges, so the boards can easily fit together.

APPLICATIONS

- Interior Cladding

PROFILE VIEW

Shiplap with Gap (SL-G)

Deck boards with notches cut into the top and bottom of the edges at different depths, revealing a small gap on the face of the boards.

APPLICATIONS

- Interior Cladding
