

I'm especially interested in UI/UX because I enjoy thinking about how people move through and experience design. Your studio's work feels thoughtful and culturally aware, and I'm drawn to how design is used not just to look good, but to say something and solve real problems. I like the process of testing ideas, fixing what doesn't work, and making things feel clear and intuitive.

What attracts me to Sid Lee is the way design, strategy, and culture come together in the work. In projects like the Loto-Quebec mobile experience and the redesign of digital platforms such as TFO.org, I admire how the UI is not only visually engaging but also thoughtfully structured to support user tasks and accessibility.

During my studies, I've built a strong foundation in visual communication, layout, and design thinking. I'm also open to working in branding and motion graphics, as I see them as closely connected to digital and interactive design rather than separate paths.

Thank you for taking the time to read my application. I'd really value the opportunity to learn from your team and contribute my skills, curiosity, and work ethic to Sid Lee Toronto.

Sincerely,
Adel Boudadi

Passionate and focused designer creating clear, strategic visuals that align with a client's brand and goals. Driven to help growing companies shape their future through thoughtful design.
