SECTION 11: TOXICOLOGICAL INFORMATION

11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

Acute toxicity - Ingestion	Calculation method : Not classified. Calculation method : Calculated acute toxicity estimate (ATE) - 407777.78
Acute toxicity - Skin Contact	Calculation method : Not classified.
Acute toxicity - Inhalation	Calculation method : Not classified.
Skin corrosion/irritation	Calculation method : Causes skin irritation. In an OECD 404 guideline study with New Zealand rabbits a slightly irritating property of ethyl 2-cyanoacrylate was shown with a primary dermal irritation index (PDII) of 0.87 (mean).
Serious eye damage/irritation	Calculation method : Causes serious eye irritation. Ethyl 2-cyanoacrylate was tested in an OECD 405 guideline study resulting in an overall irritation score of 29.33 (mean) with reversibility within 24 hours.
Skin sensitization data	Calculation method : Not classified. It is not a skin sensitizer.
Respiratory sensitization data	Calculation method : Not classified.
Germ cell mutagenicity	Calculation method : Not classified. There is no evidence of mutagenic potential.
Carcinogenicity	Calculation method : Not classified. No evidence of carcinogenicity.
Reproductive toxicity	Calculation method : Not classified. No evidence of reproductive effects.
Lactation	Calculation method : Not classified.
STOT - single exposure	Calculation method : May cause respiratory irritation. Evidence for respiratory irritation induced by methyl 2-cyanoacrylate exists from a study with human volunteers, and it is feasible to assign similar properties to ethyl 2-cyanoacrylate (ECA). Based on the high structural and physicochemical similarity and in view of the overall irritating properties, it is considered that ECA also exerts respiratory irritation.
STOT - repeated exposure	Calculation method : Not classified.
Aspiration hazard	Calculation method : Not classified.

12.2 Persistence and degradability

No information available.
In presence of moisture ethyl 2-cyanoacrylate polymerises within seconds (inherent property of ethyl 2-cyanoacrylate based instant glues).

12.3 Bioaccumulative potential

No information available.
In presence of moisture ethyl 2-cyanoacrylate polymerises within seconds (inherent property of ethyl 2-cyanoacrylate based instant glues). Thus, very low determined monomer concentrations in water or moist media represent a non-steady state situation from which a defined effective concentration cannot be derived.
