

BIHO

TWIN-GUN AND MISSILE AIR DEFENSE SYSTEM

Proudly serves the Korean Army | High technology transfer and localisation
Excellent hit and kill probability | Automatic target detecting and tracking system

GENERAL

- 30mm twin-gun and missile system to defend against various low-altitude aerial threats with agile mobility

General

Combat weight	26.5 ton
Crew	4
Max. speed	60 km/h
Engine	520 hp, V-type, 10 cylinder, diesel
Transmission	Hydrostatic-mechanical, fully automatic

FIRING PERFORMANCE

- Excellent hit and kill probability with precise gun and missile system with real-time fire control
- Automatic target detecting and tracking capability in any type of weather, day or night

Fire Power

	Caliber	30 mm (twin)
Twin-gun	Rate of fire	2 × 600 rounds/min
	Max. effective range	3 km
	Guided missile	Max. effective range

Detecting and Tracking System

Radar	Detecting range	21 km
	Type	X-band
EOTS	TV	Visual ray
	Thermal	Infra red
