

## How LanternBRP™ Powers the Future of Agriculture

**87%** forecast accuracy, with lower overstock and stockouts.

### Connecting Every Part of Your Operation for Optimal Efficiency

LanternBRP™ unifies weather, sensor, and operational data to predict risk and optimize decisions in real time.

#### Crop Planning

*What will I plant? How much will I need?*

LanternBRP™ unifies weather, soil, and market data to guide planting and yield in real time.

#### Supply Chain Traceability

*Where is my produce? What is the condition?*

IoT sensors and AI track conditions from field to delivery, ensuring safety, and full visibility.

#### Equipment Maintenance

*How do I keep machinery running? When will it fail?*

AI and sensor data predict failures and trigger maintenance, reducing downtime.

#### Compliance & Audits

*Is my data secure and audit-ready?*

Automates audit logs and compliant tagging with full traceability.

### The LanternBRP™ in Action

AgriGrow used LanternBRP™ to improve demand forecasting, inventory, and customer growth.

“In agriculture, timing is everything. Lantern’s AI predicts seed demand better than anything we’ve seen. We went from guessing to knowing. The result was fewer stockouts, less waste, and customers who trust us.

- CEO, AgriGrow Supply

**\$1.4 Million**

Seed Demand Savings

**\$1.2 Million**

JIT Inventory Optimization

**\$0.7 Million**

Lower CAC

**\$0.5 Million**

Higher Customer LTV
