

How LanternBRP™ Powers the Future of Manufacturing

65% of mid-market manufacturers lack inventory visibility

Source: Deloitte

The First and Only Single AI Platform that Connects every part of your Operation. LanternBRP™ connects sales, production, inventory, and supply chain systems to deliver real-time demand intelligence. Bringing clarity and control to modern supply chains.

Inventory Management

What inventory do I need and when do I need it?

LanternBRP™ predictive insights tell you what to stock, when to stock it, and how much you'll need.

RFID Tags

How does it get where it needed to go?

End-to-end tracking that follows every material, every movement, and every condition in real time.

Demand Visibility

What demand is coming next, and where will it go?

AI-native forecasting that predicts demand before it happens.

Compliance & Audits

Is my data secure and audit-ready?

Full integration of compliant ready tags with complete traceability.

The LanternBRP™ in Action

Estee deployed LanternBRP™ across all manufacturing and distribution operations, leveraging the platform's AI-native capabilities to transform operations.

“Lantern BRP transformed how we operate. The AI capabilities delivered savings we didn't know were possible: identifying BOM optimizations, predicting demand, and catching quality issues before they happened. The \$4.2 million in savings was realized faster than we expected.
