

Resources Page – Clickable Tiles Guide

All resource tiles on this page must be fully clickable.

Each tile should be linked to its correct PDF or DOC download file.

When a user clicks on a resource tile, it should open or download the assigned document immediately.

Ensure no tile is static or non-functional.

For each resource, verify the correct file path is attached (PDF/DOC).

If a resource is not ready, link it to a placeholder document until final content is available.

This ensures a smooth user experience and prevents broken links on the website.
