

Digital ID cards: dental insurance made easy

Don't forget— you can access your Delta Dental ID card digitally using the Member Portal or on the mobile app! A digital ID card is more sustainable because it reduces paper waste. It's also convenient and available anytime, anywhere, at your fingertips.

How to access your digital ID card on the Member Portal:

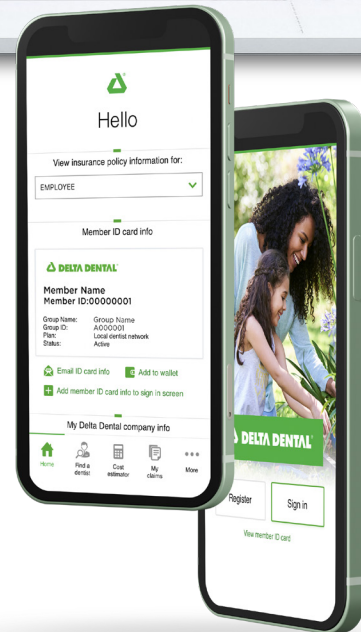

1. Visit <https://www.memberportal.com/mp/mn/> and click “Sign up!” to register or enter your username and password to log in.
2. Click on your dental plan.
3. Click “View & Print Member ID Card” on the top righthand side of the page.
4. Click “Print ID Card”.

How to access your digital ID card on the mobile app:

1. Download the Delta Dental mobile app via Apple's App Store or Google Play.
2. Log in using the same credentials you use for the Delta Dental Member Portal.
3. Your member ID card will be accessible and visible.
4. Directly under your member ID card, you will have the option to:
 - a. Email your ID card.
 - b. Add your ID card to your wallet if you have an Apple device.
 - c. Make your member ID information visible on the app's login screen by clicking “Add member ID card info to sign in screen”.

How to provide member ID information to your dentist:

1. Your digital ID card can be used at a dental visit in place of your physical ID card.
2. You do not need your ID card when you receive care from your dentist. You will need to provide them with your ID number, and your group name and group number (if applicable). Once your dentist has that information, they will be able to access your eligibility and benefits within our system.
3. Your coverage can be verified without an ID card by contacting customer service at 1-800-448-3815. Customer service can provide your subscriber ID number over the phone (after answering questions to confirm identification).
