

PROCELL HAIR REJUVENATION POST-CARE

POST-CARE

IMMEDIATELY AFTER TREATMENT

- Do not apply anything to the scalp in the immediate post-treatment window
- Do not touch, rub, or scratch the scalp
- Protect scalp from direct sun exposure

BEGINNING 24 HOURS AFTER TREATMENT

- Begin applying Procell Hair Aftercare serum daily once 24 hours has passed
- Ensure scalp is clean and dry before applying. Shake the vial well.
- Apply several drops of serum directly to thinning areas of concern
- Lightly massage or gently comb serum into the scalp
- Allow serum to fully absorb before brushing aggressively or applying styling products
- Continue daily use between sessions — serum can be used up until the morning of your next appointment

FOR 3 DAYS AFTER EACH SESSION

- Discontinue any blood thinners as directed
- Take cold sore antiviral medication if applicable — continue as directed by your physician

HAIR CARE DURING TREATMENT

- Do not dry hair aggressively with a towel — pat gently. Aggressive towel drying increases shedding and stresses follicles.
- Minimize heat styling during the series — excessive heat can stress sensitized follicles
- Avoid chemical treatments — coloring, perming, relaxing — during the active series. Discuss timing with your provider.
- No working out or submerging for 24 hours after each session — you may shower

ONGOING

- Continue daily home care serum use between professional sessions for best results
- Protect scalp from prolonged sun exposure — wear a hat outdoors when possible
- Stay hydrated and maintain overall health — hair growth is closely tied to nutrition, hormonal balance, and lifestyle
- Standard protocol is 6 sessions spaced 2 weeks apart over 3 months, followed by maintenance every 3-6 months
- Contact your provider immediately if you experience abnormal pain, discharge, fever, or signs of infection at the treatment site

Please review What to Expect and FAQ pages to know what to expect and plan for..

All products are recommended to maximize your experience but are not required to see great results.

Individual results vary. No outcomes can be guaranteed.
