

MUNICH: Autonomous Logistics Summit

Where Europe's freight industry makes its AV decisions.

13 MAY 2027

Munich Urban Colab, TU Munich

ABOUT THE SUMMIT

Hub-to-hub corridors are going commercial. Warehouse and yard robotics are past the demo stage. Ports and airports are running real fleets.

Co-produced with UnternehmerTUM at Munich Urban Colab – the mobility hub of one of Europe's largest innovation ecosystems at TU Munich. Attendance is capped so the room is decision-makers, not spectators.

WHO ATTENDS

● Logistics operators

Fleet operators, shippers, 3PLs, distribution networks and logistics leaders evaluating autonomous solutions.

● Infrastructure owners

Ports, airports, logistics hubs, warehouse operators and industrial property owners.

● Technology providers

Autonomous trucking companies, robotics providers, AV platforms and systems integrators.

● Industry partners

OEMs, Tier-1 suppliers, policymakers, investors and consultants shaping the future of logistics.

WHAT YOU'LL LEAVE WITH

- 1 A clear understanding of where autonomous freight deployment is happening first.
- 2 Direct access to operators making active procurement decisions.
- 3 Insight into emerging business models, infrastructure requirements and regulatory developments.
- 4 New relationships with the companies building Europe's autonomous logistics ecosystem.

REGISTRATION

Tickets released in five tiers · Attendance capped at 250 delegates

€450 + VAT · Tier 1 Early Bird · 50 places

Evening Dinner add-on: €350 + VAT · 50 places only
