AUTONOMY SUMMITS 2027

The integration of AVs into the movement of people and goods

18 MARCH 2027 • ROYAL INSTITUTION, LONDON

LONDON: Autonomous Cities Summit

www.autonomysummits.com

Why London?

March 2027 is the perfect time - and London is the perfect place - to gather the automated vehicle ecosystem together to push forward in the deployment of AVs across Europe.

As regulatory frameworks enabling deployment across Europe are enacted, with many deployments expected for 2027,, the time is right to negotiate partnerships across the continent. This is the spirit of our summit: the event will be laser-focused on connecting buyers from logistics, airport and public transport companies with the global leaders in automated vehicle technology.

The European AV Summit comprises;

- VIP Industry dinner
- Full day conference

We have built the event to focus on generating lasting business partnerships as we understand that autonomous vehicles are starting to deploy in Europe and offer great efficiencies for logistics, public transport and airport operators.

If your company strives to cement its leadership position within Europe’s AV ecosystem, this is the event for you.

Why participate?

B2B meetings • VIP dinner • Conference

VIP dinner

Our invitation only dinner takes place after the B2B meetings and is the perfect environment to follow up on the days discussions and build relationships needed for new business partnerships.

Conference

The full day conference takes place the following day and comprises panels from leading AV tech companies and from industries looking to integrate autonomous vehicles.

Profile of participants

About Autonomy

Our team

We’re a driven team of international mobility aficionados based in Paris, Shenzhen, London and Cape Town. We are skilled in digital communication, lead generation, conference programing and attracting quality audiences from both the public and private sector to our events.

Our mission

For sustainable mobility to work, a new ecosystem needs to be built, connected and deployed. Our mission is to help accelerate the transition by connecting policy makers with innovators, sellers with buyers and startups with funders through our digital and physical events.

Our company

Autonomy is the world-leading network of actors focused on decarbonising mobility. Our world-first digital and physical events & platforms attract global influencers and facilitate the key conversations between the public, private and academia in guiding global change.
