

Transform Your Supply Chain with Intelligent Automation

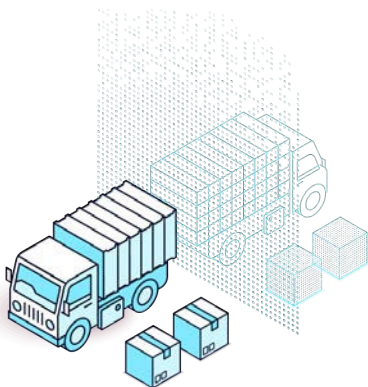

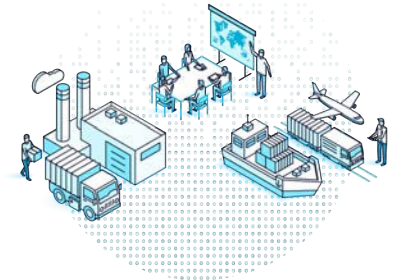

Supply Chains generate mountains of data, but it's trapped in disconnected systems, overwhelming email chains, and manual processes. FourKites Intelligent Control Tower brings order to this chaos through three groundbreaking capabilities:

1 YOUR NETWORK, IN REAL-TIME

We unite data from across your enterprise systems with FourKites' global transportation network to create a single source of truth. This real-time pulse of your business enables you to spot risks and opportunities before they impact your bottom line.

By connecting TMS, OMS, ERP, WMS and other critical systems, you gain a comprehensive view that drives smarter, faster decisions.

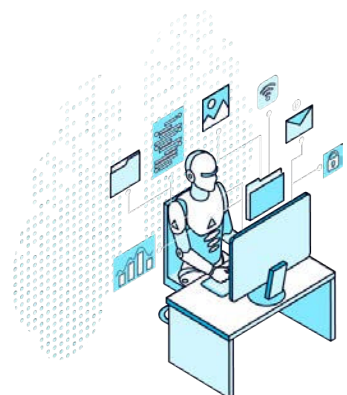

2 DIGITAL TWINS THAT PREDICT IMPACT

Our virtual models of your supply chain assets – from individual shipments to entire facility operations – continuously update to show you exactly how disruptions ripple through your network. When problems arise, you'll know precisely which customers, orders, and facilities are affected. This intelligence helps you prioritize actions based on business impact, not just urgency.

3 LOFT: A PERSONALIZED DIGITAL WORKFORCE

Transform your operations with our AI-native agent platform. Deploy battle-tested Digital Workers proven at Fortune 500 scale, then rapidly build custom agents tailored to your unique SOPs across your operating platforms using any API connection. While your team focuses on strategy, Loft handles everything from carrier updates to appointment scheduling accurately and transparently.

A Map to Automated Exception Management

Are supply chain delays crushing your inbound operations?

Stockouts cost you sales. Rush freight eats margin. The Intelligent Control Tower spots delays before they hit your dock and routes around problems automatically.

- Prevent stockouts with early delay warnings
- Cut expedited freight costs
- Lower safety stock requirements
- Auto-onboard supplier tracking

Is your yard bleeding money through detention and lost throughput?

Trailers sit idle because nobody knows where they are. Drivers wait because scheduling is manual chaos. The Intelligent Control Tower automates yard execution end-to-end.

- Cut detention costs in half with automated workflows
- Speed gate processing with fully autonomous operations
- Automate scheduling across all facilities – including vendors and customers
- Track every trailer in real time

Are late deliveries damaging customer relationships?

Orders arrive late. Customers stop trusting you. The Intelligent Control Tower monitors every outbound shipment from dock to doorstep, fixing problems before customers notice.

- Predict delivery failures days ahead
- Send proactive updates automatically
- Resolve issues at first detection
- Automate appointment management

Loft: Proven Agents & Rapid Customization

Build Your Digital Workforce

Your team spends hours tracking down carriers, chasing documents, and managing appointments. The FourKites Intelligent Network trains AI agents on 3.2 million daily shipments, then adapts them to your operating procedures—so they work exactly how you work.

Tracy: Investigates exceptions and contacts carriers the moment problems surface

Sam: Onboards suppliers fast, tracking orders through unstructured data and vendor chaos

Alan: Manages scheduling across all portals and reschedules automatically when ETAs shift

Cassie: Sends proactive updates to customers based on your SOPs when orders hit risk thresholds

Polly: Hunts missing PODs and documentation, resolves disputes without your team lifting a finger

Didi (Coming Soon): Catches detention and demurrage issues early, orchestrates resolution before costs pile up

Sophie: Build your own agent! Describe what you need for any business function. She builds the agent. Days, not months.

Ready to Fix Your Supply Chain's Weak Links?

Supply chain challenges rarely have a single cause. Let's analyze where your breakdowns begin and build a solution that drives real results. Schedule a consultation to:

- Map your current supply chain challenges
- Identify the root causes of disruptions
- See how our AI-powered solutions work in action
- Build a transformation plan that fits your needs
