There's only one COLORSTEEL®

Made local. Proudly made in New Zealand.

COLORSTEEL® is proudly made right here by New Zealand Steel. A product shaped through Kiwi innovation and expertise, helping to create the spaces and places where life happens, families are raised and memories are made. A New Zealand way of building for a New Zealand way of life.

Made to protect. Designed for our conditions.

COLORSTEEL® is engineered to withstand New Zealand's harshest environments and diverse weather conditions. With advanced Activate® technology, it's designed to deliver enhanced corrosion resistance, protecting the things that matter most.

Made to last. Backed for up to 50 years.

COLORSTEEL® delivers long-term performance you can count on. It's backed by industry-leading warranties of up to 50 years, so you can have confidence your project will stand the test of time.

Ensure it's genuine. There's only one COLORSTEEL®.

There's only one COLORSTEEL® - the product that has been protecting the places we live, work and play for over 40 years. So when it's time to build or renovate, ensure you're getting the real thing. Ask for genuine COLORSTEEL® by name.

Choosing the right colour

Choosing the colour for your roof, cladding or fencing is an important decision. Here are some tips to help you.

Three's the limit

Selecting colours for your roof, cladding or fencing is an important decision. A simple rule is to use no more than three colours: a field colour (the main colour, such as cladding or roof), an accent colour (for doors, joinery or shutters), and a trim colour (for windows, gutters and downpipes). Accents can be bold, while trim colours should remain the same as, or complement, the field colour for a more cohesive look.

Your surroundings

Think about how your home sits in its environment. Lighter or brighter colours can help homes set back from the road or surrounded by trees stand out, while neutral colours often blend well with the landscape and create a welcoming feel. Different settings and architectural styles suit different colour palettes, so take cues from your location and neighbouring homes.

Work with what you have

When renovating, factor in existing elements like stonework, paths and driveways, and choose colours that complement the current palette.

Finishes

COLORSTEEL® offers a range of painted finishes, giving you the freedom to define the look and feel of your home or building – from timeless and familiar, to modern, architectural and truly distinctive.

You can choose from our most popular Classic finish, selected colours in a Low Gloss finish, or for a refined and distinctive aesthetic, our premium Matte finish range.

Rest assured, product performance is not impacted by your choice of colour or finish. Product warranties relate to your project's environmental climatic conditions.

Classic

A timeless look, trusted for generations

This is the traditional COLORSTEEL® look – the one New Zealanders have relied on for decades. With a smooth surface and a noticeable sheen, it reflects light and colour clearly, delivering a clean, confident appearance that suits everything from classic homes to contemporary builds.

Low Gloss

A softer sheen for a more contemporary feel

Low Gloss offers a modern alternative to the Classic finish, with a subtler sheen that reduces light reflection and creates a softer, more muted appearance. This finish is ideal for designs that favour understatement and refinement. Because it reflects less light, colours in Low Gloss will often appear slightly lighter than the same colour in Classic.

Matte

A modern and standout aesthetic

COLORSTEEL® Matte delivers a truly unique aesthetic. Featuring innovative micro-wrinkle technology, the surface gently diffuses light rather than reflecting it, creating a soft, textured look with a subtle lustre. This premium finish is designed to complement modern architectural forms and natural materials, adding depth and character while maintaining an understated presence.

COLORSTEEL MAXAM®

COLORSTEEL MAXAM® brings together the outstanding quality and consistency COLORSTEEL® is known for, with game-changing Activate® technology. COLORSTEEL MAXAM® is suitable for most of New Zealand’s environmental conditions, offering exceptional durability and corrosion protection, from alpine regions to urban city centres.

COLORSTEEL ALTIMATE®

COLORSTEEL ALTIMATE® is designed for projects exposed to extremely severe marine and breaking surf environments. It combines a marine grade aluminium substrate with proven COLORSTEEL® paint technology to deliver superior corrosion protection where salt exposure is at its most extreme. Your COLORSTEEL® supplier can advise if this is the right solution for your project.

Order your colour samples

When selecting your colour and finish, there’s no substitute for the real thing. Scan the QR code to order your genuine COLORSTEEL® samples, delivered straight to your door, helping you design your home’s aesthetic from the outside in with confidence and ease.

● Colour available in both Classic and Low Gloss finish, except for Windsor Grey available in Low Gloss only. Low Gloss Total Solar Reflectance (TSR) and Light Reflectance Values (LRV) can be found at colorsteel.co.nz.

The TSR and LRV percentages listed in this colour chart are accurate at the time of printing. Please note that these values are subject to a tolerance of +/-5%. Factors such as production tolerances, natural weathering and environmental conditions may impact the quoted values. For the most up-to-date TSR and LRV values, we recommend referring to our website, where any revisions or updates will be reflected. It is important to verify the current values prior to making any decisions or selections based on these metrics.
