Building progress in October 2024

Western Sales Relocates to State-of-the-Art Facility

Rosetown, SK – For six decades, Western Sales has been a landmark along Highway 7 West, serving the Rosetown community with top-tier farming equipment and exceptional service. Whether as a shelter from storms or a convenient meeting place, the dealership has remained a trusted fixture for local farmers and agricultural professionals.

Now, Western Sales is preparing for a new chapter, moving west along Highway 7 into a brand-new, cutting-edge facility. The modernized location, set to open in Spring 2025, will span an impressive 95,000 square feet, making it one of the largest John Deere dealerships to date.

Among its advanced features, the facility will house 21 service bays, four wash bays, and a specialized equipment set-up shop designed to accommodate large-scale machinery, including sprayers with extended booms, drills, carts, tractors, and combines.

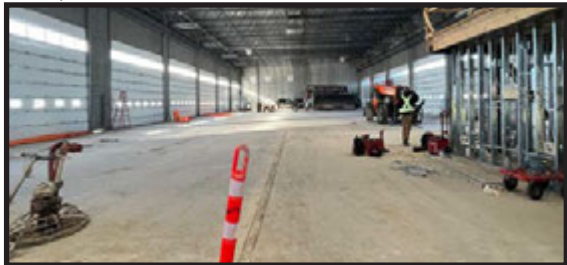

A major highlight of the new dealership is its 13,000-square-foot parts warehouse, which will be equipped with a high-tech Vertical Lift Module. This automated storage and retrieval system will streamline the process of accessing small parts, boosting efficiency, and optimizing space and inventory management.

The new dealership's planning process included extensive consultation with service and parts managers. Most notably, service technicians and shop foremen played a leading role in designing and setting up the new service shop areas, making them among the most ergonomic and efficient in any John Deere facility.

"Our new building is a testament to our commitment to supporting the community," said Western Sales President Carl Persson. "This expansion will create job opportunities, drive growth in the Agriculture sector, and ensure that we

remain an integral part of Rosetown and the surrounding areas for the next 75 years."

Construction on the facility began in July and continues to progress steadily. While the location may be changing, Western Sales assures customers that its dedication to superior service and support will remain unwavering—anytime, anywhere.

SEE & SPRAY™ SELECT

BROADCAST AND TARGETED SPRAY ON FALLOW GROUND

See how you get Targeted and Broadcast Spray capabilities in one sprayer, with Targeted Spraying achieving a similar hit rate to Broadcast Spraying.

CAMERAS

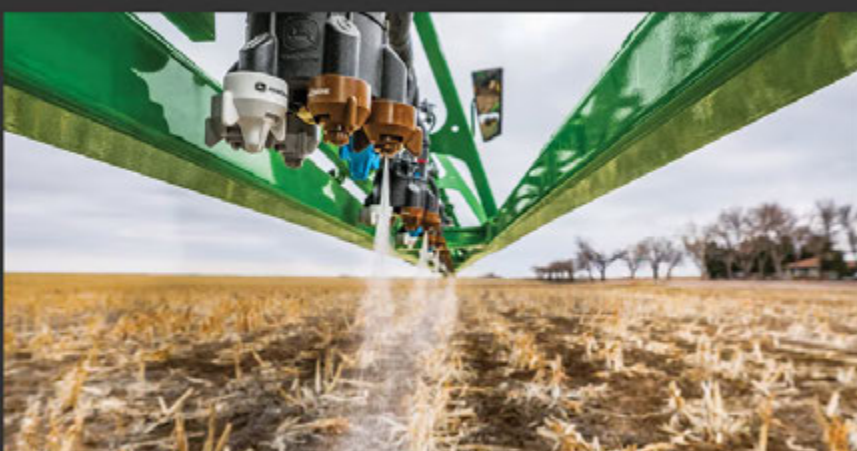

Scan Fallow Ground

When using the targeted spray, small cameras integrated into the boom continuously scan the field and send data to the sprayer's vision processing unit.

VISION PROCESSING UNITS

Identifies Weeds

See & Spray Selects processors detect the colour green, applying non-residual herbicide only on weeds.

TARGETED SPRAYING

Activate only Nozzles Needed

Once weeds are identified, specific nozzles are activated to target spray them. The number of nozzles activated can vary based on weed pressure within that area of the field. When necessary, the sprayer can switch from Targeted Spraying to Broadcast Spraying, all with the push of a button on the in-cab display.

AS-APPLIED COVERAGE MAPS

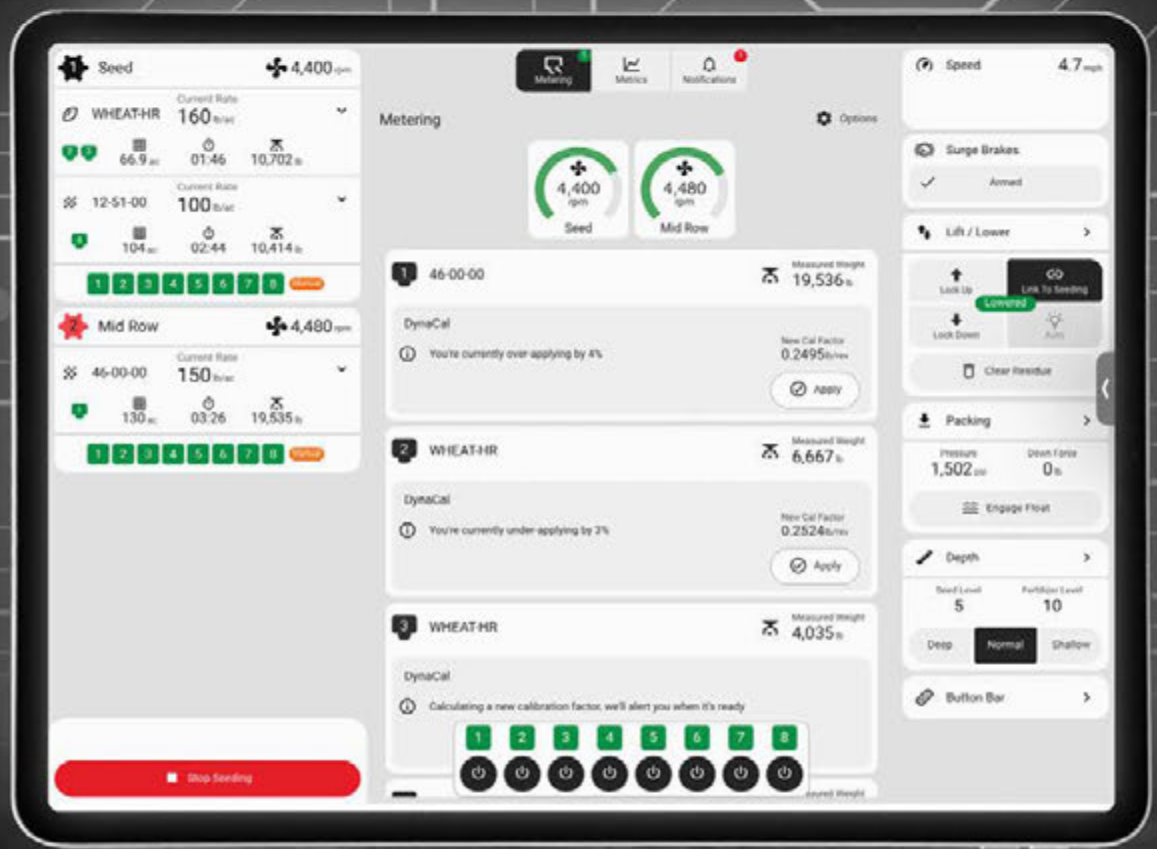

Record Where Herbicide Was Applied

Using the in-cab display, See & Spray Select documents where herbicide was applied. In addition, the display provides a coverage map of the area travelled where herbicide was not applied. This documentation is streamed to your John Deere Operations Center™ account, and enables you to track performance data and savings, to make informed decisions in your weed management program.

TEACH YOUR CURRENT EQUIPMENT NEW TRICKS

Your equipment is a big investment and you’ve got it running just how you want it. Why not get even more return on that investment with a performance upgrade kit? Similar to purchasing new from the factory, you get a new serial number and 1-year warranty — for a lower price than buying new.

Ask us for details on available performance upgrades.

Scan QR code to learn more.

PERFORMANCE UPGRADES

PLANTER UPGRADES

SPRAYER UPGRADES

HARVEST UPGRADES

CUSTOMIZE

Our trained technicians will help you determine the best upgrade solution for your operation.

INSTALL

Add the latest technology and replace worn parts at the same time.

GROW

Strengthen ROI, reduce input costs and improve yields* with new-to-you performance.

*Internal comparison between ExactEmerge and MaxEmerge 5e row units and components with original MaxEmerge row units and components; between John Deere sprayers without ExactApply with John Deere sprayers equipped with ExactApply. Individual results will vary depending on field and growing conditions.

BEAT THE CLOCK.

High-performance Brandt 10", 13", and 16" swing away augers keep your grain flowing with the #1 speed and efficiency in the industry, helping you beat the clock during harvest.

More Efficient

Brandt EZReach extendable swing hoppers for 13HP+ and 16HP augers feature a 25% larger hopper to speed up your operation.

Easier to Use

The EZSWING hopper mover is available with electric controls to guarantee easy maneuvering with a remote control or LeadHand app.

Longer Lasting

Brandt's extended-life auger flighting, premium powder-coat paint finish, and easy maintenance access points all keep your auger lasting longer.

THE NEW 3545 7-PLEX 80' TO 100' PARALINK HOE DRILLS

REDEFINING PRODUCTIVITY

The 3545 is the fourth generation of the highly successful ParaLink Hoe Drill™. This 7-Plex design not only incorporates all the features and options of the acclaimed 3335 series but also enhances productivity, trash clearance, and flotation, while significantly reducing transport size.

WESTERN SALES
Powered by AWDG

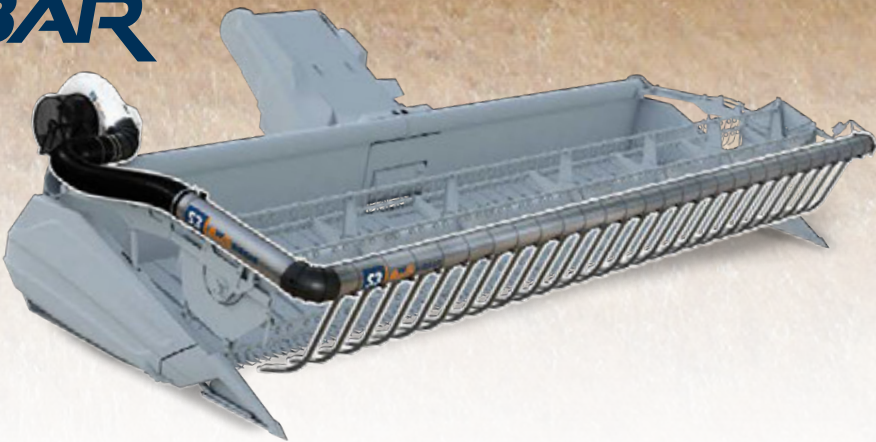

Increase yield by 2-4 bushels per acre with up to 100% ROI in 1000 acres.

AIRBAR®

When added to a combine header, the S3 AWS Airbar® reduces or eliminates shatter loss and allows for significantly increased ground speed.

- Improved feeding**
- Reduced shatter loss**
- Faster ground speed**
- Increased operating efficiency**

AIRBAR®_{FD}
FLOW DYNAMICS

Made specifically for pressure-hungry header widths of over 45', the patent-pending Flow Dynamics® system (Airbar FD) delivers twin-channel airflow for up to a 25% increase in evenly-distributed airflow at the nozzle.

more **yield**
from your **field**
with air-assist harvesting

AIRBAR®_{FDX}
FLOW DYNAMICS

For the ultimate in air-assist harvesting performance, the Airbar FDX® model pairs the twin-channel Flow Dynamics (FD model) system with the high-output X-model fan & chassis. This adds an additional 25% airflow for a total increase of over 50% of a standard air-assist harvesting system.

Available for both draper and auger headers.
All makes and models.

Unmatched Performance

TopDown 300-700 is a high intensity multipurpose cultivator, performing both a full-scale shallow cultivation and a deep cultivation in one single pass. By adapting the working result to different conditions in the field, TopDown delivers an unmatched performance.

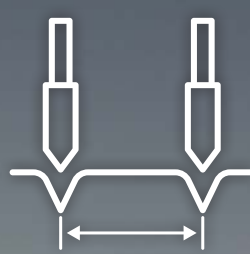

10-30' (3-7 m)

12" (30cm)

>150hp

10.5" (27 cm)

Multiple operations in one pass

TopDown combines an intensive disc cultivator along with a robust three axle tine cultivator in the same machine.

The 5" (12.5 cm) spaced discs on individually suspended disc arms, create fine tilth by cutting and mixing the top soil.

The 10.5" (27 cm) spaced tines then loosen and mix the soil and crop residues down to 12" (30 cm) working depth.

In the final two working zones, the leveller and packer then concludes by ensuring an even and fully reconsolidated surface.

The future of tillage is optimized

The next step after variable rate application of seed and fertilizer is to apply the same thinking to tillage. Introducing prescription map tillage for TopDown. Savings wait to be unleashed using the rule "as much as necessary, as little as possible".

Equipping TopDown with the iPad-based E-Control system, enables full control as well as prescription map tillage.

Learn more about how TopDown can optimize your farming operation at www.vaderstad.com

TopDown 300 - 700

VÄDERSTAD

BELT IT OUT.

Brandt field grain belts deliver rapid, gentle transfer of any crop. They are available in 15" or 20" gas or electric models, with an optional gas mover kit.

More Efficient

Optimized intake and transition increases grain-flow efficiency, achieving peak performance.

Greater Versatility

The retractable hopper and intake delivers better clearance for low bin unloads with a range of 7.5" to 16".

Easier to Operate

Brandt's EZTRAK tensioning and tracking system keeps your belt aligned and properly tensioned.

LEAD
THE
FIELD.

PROVEN PRODUCTIVITY.

Get the best residue management and seedbed preparation in fewer passes with the new Brandt High-Speed Disc.

More Speed

Spend less time in the field with operating speeds of 10 to 14 mph, and our easy-to-use wing down-pressure system.

More Uptime

Purpose-built components with a robotically welded frame and greaseless bearings ensure near-zero maintenance for more uptime and durability.

More Options

Choose from seven unit sizes and a variety of discs and rollers that are perfectly suited to your field, conditions, and desired finish.
