Stop Blocked Drains
Before They Start

Stop Blocked Drains Before They Start

Food waste, grease, and debris can quickly clog your sink and damage your plumbing. Without proper filtration, everyday washing leads to buildup, bad smells, and costly repairs.

The Smart Solution

A great addition to any kitchen, this straining basket and filter protects your plumbing while keeping your sink clean and efficient.

Premium In-Sink Filter Basket

-  Catches food waste before it enters your drain
-  Allows water to flow freely
-  Assists with your compliance requirements
-  Easy-lift handle for quick emptying
-  Strong, durable stainless steel construction

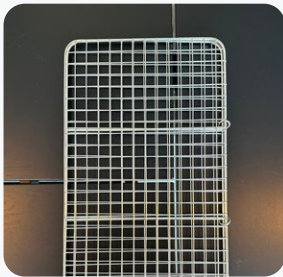

Scraper & plug included

Mesh and Pad Filtration

Our precision stainless steel mesh and inserted pad captures even the smallest particles—keeping your pipes clear and your kitchen hygienic.

In Sink Filter and Pad Protection

- 🔥 Captures fine silt particles
- 🔥 Reduces load on your passive grease trap or Grease Removal Unit(GRU)
- 🔥 Improves drainage performance
- 🔥 One pad per day (normal use)

Designed for **Every Kitchen**
