

This is the Sticks pendant lamp. At the bottom, we have drawn a wooden circle. From the inside, the circle can be screwed onto the three wooden straight slats on the outside. In this way, the lampshade can be slid in from the top. The circle around the lampshade at the top, recessed into the wood, is made of brown steel.

The ceiling cap in brown steel, 9 cm in diameter and 2.5 cm in height. In addition to the single complete lamps, we would also like to receive them without a ceiling cap so they can be combined in bundles.
