

Matter certificates delivered to your factory production line

The Kudelski IoT keySTREAM FactoryBox enables device manufacturers to have their own Matter product certificate services directly connected to their production line.

HOW IT WORKS

Secure and simple API

With a FIPS140-3 certified HSM and a hardened operating system, our FactoryBox provides a secure and simple API to request matter DACs or signing services for your devices.

FEATURES

We generate the certificates you need

Using Kudelski IoT keySTREAM PKI-as-a-Service, we deliver Matter-compliant certificates that will identify your device as officially certified by Matter and part of the trusted ecosystem, enabling security, interoperability and ease of use for end users.

Trusted certificates from a company that has been creating device credentials for 30+ years

Cloud setup of your vendor-specific Product Attestation Intermediate (PAI)

Managed generation and delivery of Matter Device Attestation Certificates (DAC)

Secure batch delivery for offline factories

IMPLEMENTATION

Your Matter journey with Kudelski IoT

Order your FactoryBox

First create your account on our Matter website. We will validate your certification status with CSA and provision your account.

Configure your FactoryBox

Using an online wizard, Kudelski IoT will collect all technical information related to your production line, like network configuration and secrets required to connect to your FactoryBox.

Production of your FactoryBox

Kudelski IoT will produce your FactoryBox in our secure facility using the configuration information you provided, and ship it to you for connection to your production line.

Certificate delivery

We deliver your certificate and private key batches for programming into your devices which can now be onboarded into the Matter ecosystem.

MORE THAN CERTIFICATES?

We offer full security lifecycle management

A successful IoT business model requires an end-to-end approach to security. In addition to Matter certificates, our team of experts can assist you with:

Compliance & Risk Assessment

We help you evaluate your risk and your device's security.

Multi-level Secret Provisioning

Customize and provision devices during production or in the field.

PKI as a Service

We can also generate any non-Matter secrets or certificates you may require for your devices.

Full Lifecycle Security & Signing Services

Monitor and securely update your device throughout its lifetime.
