

SURFATA DISPERSE® 14

Composition

Organic compound neutralized.

Application

SURFATA DISPERSE® 14 Wetting and dispersing additive for aqueous coating systems. Very effective with inorganic pigments and mineral fillers in the manufacture of decorative paints and slurries.

Mode of Action

SURFATA DISPERSE® 14 Deflocculate pigments through steric stabilization of the pigments. Due to the small particle sizes of the pigments, high gloss is achieved and color strength improved. Additionally, transparency and hiding power are increased.

Typical Properties

Appearance, 25 °C	Colorless to yellow liquid
Non-volatile matter, %	> 25
Flashpoint, °C	> 100

Values indicated in this data sheet describe typical properties and do not constitute specification limits. Please refer to product spec sheet.

Application Areas

- Mineral Slurries
- Decorative coatings

Features and Benefits

- Reduces mill-base time.
- Prevents the thixotropy and reduces the viscosity.
- Stabilize the pigment dispersion.
- Gloss and color strength are improved.
- Prevents flooding/floating and sedimentation.
- APE and VOC Free

SURFATA DISPERSE[®] 14

Incorporation and Dosage

For optimum performance the **SURFATA DISPERSE[®] 14** should be added to the binder before addition of the pigments.

	Titanium Dioxide	Inorganic Pigments
% additive on pigment:	0,2 – 1	0,5 – 3

Transport and Storage

The product may have slight turbidity during storage, but there is no interference in the performance of the product.

Keep in a dry, cool and well-ventilated place. Keep product away from heat and sources of ignition. Store in original containers.

Safety and Handling

Please refer to product MSDS.
