

SURFATA DISPERSE® 15

Composition

Sodium salt of a carboxylic copolymer

Application

SURFATA DISPERSE® 15 is an extremely versatile pigment dispersant for acrylic, acrylic-styrene, and vinyl acrylic based coatings. It is very effective as a general dispersant in aqueous applications.

Mode of Action

SURFATA DISPERSE® 15 deflocculate pigments through steric stabilization of the pigments. Due to the small particle sizes of the pigments, high gloss is achieved and color strength improved. Additionally, transparency and hiding power are increased.

Typical Properties

Appearance, 25 °C	Colorless to yellow liquid, may be hazy liquid
Non-volatile matter, %	> 25
Flashpoint, °C	> 100

Values indicated in this data sheet describe typical properties and do not constitute specification limits. Please refer to product spec sheet.

Application Areas

- Decorative coatings
- Mineral Slurries
- Water-based applications

Features and Benefits

- Very effective with inorganic pigments and mineral fillers.
- Excellent scrub and corrosion resistance.
- Excellent gloss development
- APE and VOC Free
- Better interaction with HASE and HEUR thickeners

SURFATA DISPERSE® 15

Incorporation and Dosage

For optimum performance the **SURFATA DISPERSE® 15** should be added to the binder before addition of the pigments.

	Titanium Dioxide	Inorganic Pigments
% additive on pigment:	0,2 – 1	0,5 – 3

Transport and Storage

Separation or turbidity may occur at low temperatures. There is no interference in the product performance.

Keep in a dry, cool and well-ventilated place. Keep product away from heat and sources of ignition. Store in original containers.

Safety and Handling

Please refer to product MSDS.
