## Description

The QLS-UNIVERSAL 3200 is a compact, general-purpose pressure transducer for industrial monitoring and control. A piezoresistive sensing element is oil-filled and isolated by a fully welded 316L stainless-steel diaphragm with NBR/FKM/copper process sealing to suit common media. Output options include 4–20 mA and voltage signals (0–5 V, 1–5 V, 0–10 V, 0.5–4.5 V) with ranges from 0–0.025 bar up to 0–250 bar gauge, 0–25 bar absolute, and compound −1–+24 bar. The unit meets IP65/IP67 protection and is qualified for EMC immunity to IEC 61000-4 tests; long-term stability is ≤ ±0.2 % FS/year (max.).
