The EASYklean Pro S-10 is the latest machine in the Metal Science range.

Lightweight inverter driven, the S-10 has 100 amps of available power, that is controlled by a single power level dial, giving the user ultimate current control from the thinnest gauge TIG welds right through to the heaviest MIG welds.

The S-10 can use all styles of brushes from the rest of the EASYklean family of machines, whilst also having the ability to use larger scale brushes when you really need that extra power and coverage.
