

Protect your *extended* attack surface

A unified platform for preemptive security. From Attack Surface Management to Dark Web Monitoring and Investigations.

Searchlight Cyber's Preemptive Threat Exposure Management (PTEM) platform gives organizations unrivaled access to unmanaged infrastructure, subdomains, and relevant and actionable dark web intelligence – helping them separate the signal from the noise and prioritize the threats that matter.

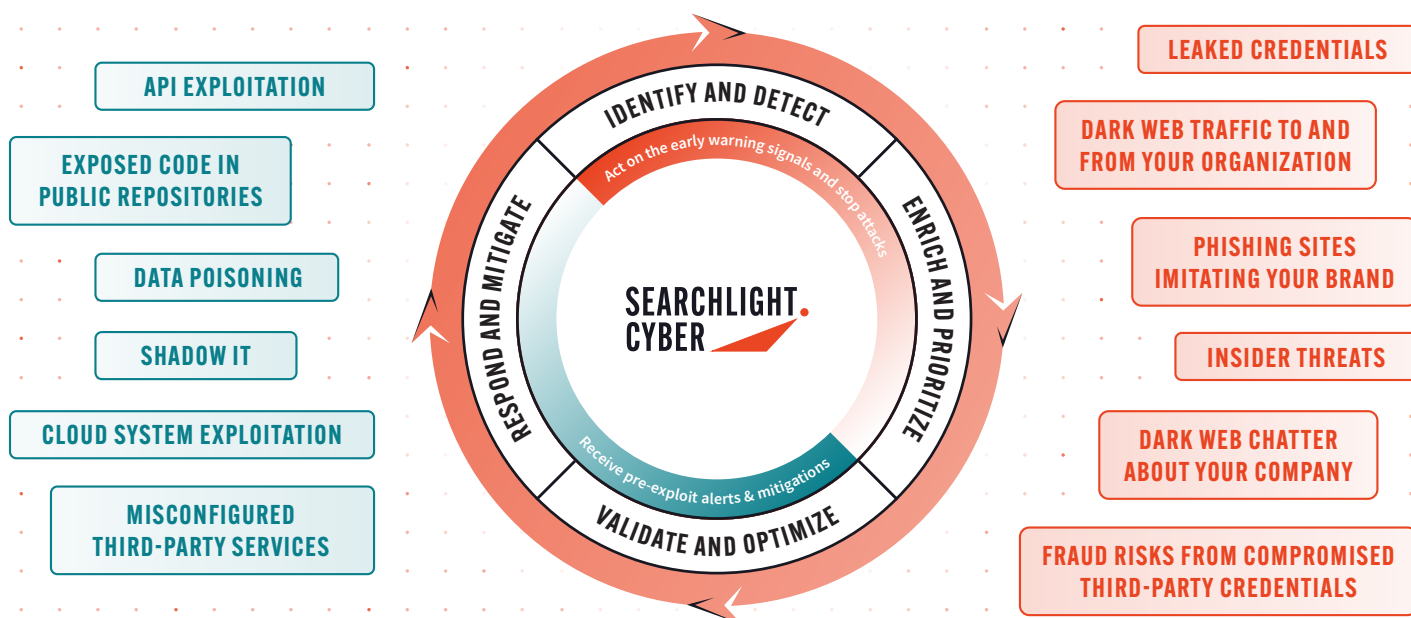

IDENTIFY THE THREATS AGAINST YOUR ATTACK SURFACE, FROM THE CLEAR WEB TO THE DARK WEB

Traditional perimeter security isn't enough anymore. Cloud tools and shadow infrastructure has expanded the attack surface and opened the door to threats beyond – from supply chain partners to threat actors operating on the dark web.

Our holistic exposure management platform gives defenders a place to see, manage, and mitigate all these external risks using a single tool – delivering hyper-personalized, high-signal alerts so your team can focus on the threats that truly matter.

PROTECT WHAT YOU'VE GOT, SEE WHAT'S COMING NEXT.

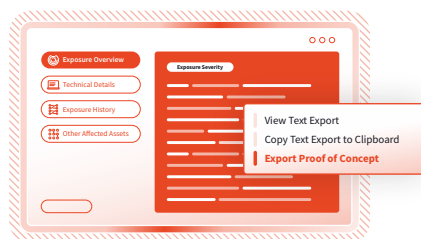

Protect your attack surface. *Preempt emerging threats.*

HOW THE SEARCHLIGHT CYBER PLATFORM WORKS

ASSETNOTE

Attack Surface Management

Defend your attack surface

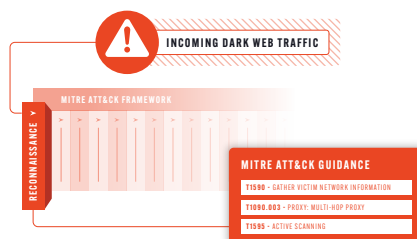

Discover your assets and uncover verified exposures across your entire attack surface - before attackers can exploit them. Stay ahead with novel vulnerability alerts fed directly into the platform by our research team.

DARKIQ

Dark web monitoring

Spot emerging threats earlier

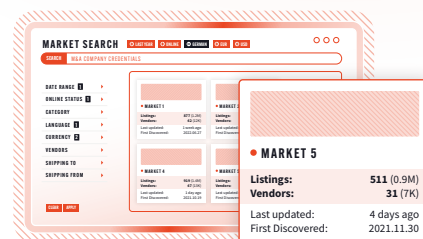

Unlock Real-time dark web monitoring to detect and prioritize emerging threats. Automatically spot risks to your brand, suppliers, and people with actionable dark web alerts – before they become costly incidents.

CERBERUS

Dark web investigations

Level-up your threat intelligence

Investigate current and emerging threats with secure access to +475 billion recaptured data points from the clear, deep, and dark web. Data that was once difficult to track is now searchable at the click of a button.

SEE HOW SEARCHLIGHT CYBER CAN UNCOVER
HIDDEN ASSETS AND EMERGING THREATS
BEFORE ATTACKERS EXPLOIT THEM.

 **BOOK A DEMO**

“ We got more done for our security in three days using Assetnote than we have in the last four years using [competing platform]. ”

VP INFORMATION SECURITY,

**SEARCHLIGHT.
CYBER**

Searchlight Cyber was founded in 2017 with a mission to stop criminals from acting with impunity. With its pioneering Preemptive Threat Exposure Management (PTM) offering, Searchlight helps organizations identify exposures and neutralize threats before attacks begin. Searchlight unifies leading Attack Surface Management, dark web intelligence, and risk management tools to help organizations separate the signal from the noise and prioritize the threats that matter. It is used by some of the world's largest enterprises, government and law enforcement agencies, and the managed security service providers at the forefront of protecting customers from external threats.
