INTRODUCTION

How to specify your Winbaum

Every Winbaum shares the same honest construction. What makes each one yours is the material you choose to live with. This catalogue gathers every finish in one place — from the stain on the cladding to the knob on the kitchen drawer.

1. **Start outside.** Choose a colourway, a roof and a window frame.
2. **Work inward.** Floors and walls first, then kitchen and bathroom.
3. **Finish by hand.** Pick the hardware, switches and textiles you will touch every day.
4. **Write it down.** Note each code on the specification sheet (p. 20) and send it to your Winbaum advisor.

Not sure where to begin? Six curated palettes on pages 18–19 combine finishes that already work together.

Timber, stone and clay vary in grain and tone — that is part of their character. Printed colours are a guide; ask for physical samples before you decide.

01 · EXTERIOR

Colourways

One architecture, nine characters. Each colourway is a cladding finish, shown here with a matching roof and frames — mix them freely on the pages that follow.

CARBON BLACK EX-01
Deep black stain; the grain stays visible.

WEATHERED GRAPHITE EX-02
Grey-brown with a softly aged look.

FALU RED EX-03
The classic Nordic red earth tone.

OXBLOOD EX-04
Deep red-brown, warm in low autumn light.

NATURAL LARCH EX-05
Clear oil; silvers gently with age.

DRIFTWOOD EX-06
Translucent white wash over visible grain.

CHALK WHITE EX-07
Opaque matte white for sun-drenched sites.

LICHEN GREY EX-08
Soft grey-green that settles into planting.

FOREST GREEN EX-09
Near-black green for wooded plots.

02 · EXTERIOR

Cladding

Each colourway up close, on vertical timber boards. Every finish can be paired with any of the three board profiles in the last row.
