About Kincora

Kincora Copper Limited (“KCC”: ASX & TSXV) is an emerging Australia-focused gold-copper explorer with a hybrid project generator strategy.

The Company is successfully proving up the prospectivity of its extensive project portfolio, which includes multiple district-scale landholdings and scalable drill ready targets. These assets are located in Australia's Lachlan Fold Belt, one of the globe's leading porphyry belts, and the historical Condobolin mining field within the Cobar basin in NSW.

The Company has already unlocked over A\$100 million of potential partner funding for multiple earlier stage and/or non-core porphyry projects. These initial deals have supported over 20,000 metres of drilling and over A\$10m of partner funded exploration since late 2024, with management fees and exploration ramping up.

Various partner discussions are ongoing for its remaining 100% owned flagship and advanced exploration stage porphyry projects.

By having a significant portfolio of partner funded large porphyry projects, and very focused capital efficient programs at our other sole funded projects, the Company is seeking to position Kincora as a leading institutional grade explorer in the public Australian and Canadian markets, and the leading project generator on the ASX.
