

PPS EQUITY FUND

As of 30 Sept 2026

INVESTMENTS

FUND DESCRIPTION

This fund invests primarily in shares of listed companies. It may, however, also invest in listed and unlisted financial instruments, and it may also hold units in collective investment schemes. Ratios may vary.

The PPS Equity Fund aims to provide investors with investment returns in excess of its benchmark while seeking to provide capital growth over the long-term.

FUND COMMENTARY

This is a domestic-only mandate that aims to outperform an investable benchmark of South African (SA) listed equities over rolling seven years. The fund is made up of a combination of active SA equity managers, who are expected to be fully invested in SA equities at all times and implement their best SA equity investment view. The manager combination is deliberately constructed to deliver more consistent returns relative to the benchmark over time.

Global growth remained more resilient than expected during the third quarter despite geopolitical tensions, higher energy prices and restrictive monetary policy. US economic activity was supported by business investment, a firm labour market and substantial spending on artificial intelligence infrastructure, with ongoing investment in data centres, semiconductors and power capacity supporting corporate earnings and growth. However, strong funding demand from both AI investment and government borrowing placed upward pressure on long-term interest rates. Inflation risks resurfaced as renewed conflict in the Middle East disrupted energy supplies and pushed oil prices above \$100 a barrel, prompting the US Federal Reserve to raise interest rates in September. South Africa's economy remained weak, with GDP contracting by 0.2% in the second quarter and 2026 growth expectations revised to around 1.2%. Nevertheless, improving fiscal outcomes, stabilising government debt and greater policy credibility provide some encouragement.

Global equities (MSCI ACWI) gained 1.6% in rand terms during the quarter, supported by strong earnings and continued AI-related investment. South African equities lagged, with the FTSE/JSE Capped All Share Index declining 0.3%, weighed down by Naspers, Prosus and consumer-focused shares. Local market performance was mixed, with Resources advancing 16.6% while Industrials and Financials fell. Despite weak growth and higher interest rates, we remain cautiously constructive on the long-term outlook for local equities given improving fiscal and structural fundamentals.

Against this backdrop, PPS Equity outperformed the FTSE/JSE Capped All Share Index marginally for the quarter, with mixed results from its underlying SA equity managers. Performance over its most recent seven year investment horizon has been good in absolute terms, as well as withing is ASISA peer group, however benchmark relative outperformance has been more challenging. PPS Equity is actively managed, and we continue making enhancements to the underlying manager combination to ensure the long-term outperformance objective of the fund is maintained. From an underlying manager perspective, the composition of the portfolio has not changed this quarter.

As of 30 Sept 2026

DISCLOSURES

Collective Investment Schemes in Securities (CIS) are generally medium-to long-term investments. The value of participatory interests (units) may go down as well as up, and past performance is not necessarily a guide to future performance. CIS are traded at ruling prices and can engage in borrowing and scrip lending up to 10% of the market value of the portfolio to bridge insufficient liquidity. The manager does not provide any guarantee either in respect of the capital or the return of a portfolio.

Total Expense Ratio (TER) is a measure that can be used by investors and advisers to determine how much of a CIS's underlying assets are relinquished as payment for services rendered in the administration of the CIS. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's.

Transaction Costs (TC) is a measure that can be used by investors and advisers to determine the costs incurred in buying and selling assets underlying the CIS. TC's are a necessary cost in administering the CIS and impact CIS's returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of CIS, the investment decisions of the investment manager and the TER.

Total Investment Charges (TIC) is a measure of total cost relating to the investment. TIC is the sum of the total expense ratio (TER) and the transaction cost (TC).

TER's and TC's are expressed as a percentage of the daily net asset value of the CIS calculated over the past one year and three-year period on an annualised basis. The TER and TC disclosed are estimates based on our best estimate of the underlying costs.

These performance figures are for lump sum investments with income distributions reinvested on the ex-dividend date. All PPS Multi-Managers performance figures and values are quoted after the deduction of costs and applicable taxes incurred within the Fund. Actual investment performance will differ based on the initial fees applicable, the actual investment date and the date of the reinvestment of income and dividend withholding tax. The reinvestment of income is calculated based on actual distributed amount and factors such as payment date and reinvestment date will be considered. Please note that performance over periods greater than one year is annualised. Annualised performance is the average return earned on an investment each year over a given time period. Performance is based on NAV to NAV calculations and calculated on a rolling monthly basis. The past performance is relevant to the investment or the service offered by the manager.

Unit Trust prices are calculated on a Net Asset Value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses from the Fund divided by the number of units in issue. Transactions must be received by the Management Company (MANCO) by 2pm to receive the net asset value price for that day. Transaction requests received after this cut off time will only be processed on the next business day, and will receive the price of that day. Linked Investment Service Providers (LISP), specify their own transaction timelines and may take up to five business days to process. Portfolio valuations occur at 3 p.m. on business days, except the last business day of the month, when it will be 5pm. Prices are published daily and are available in the daily newspapers.

A schedule of fees, charges and maximum commissions are available on request. This fund does not charge performance fees.

The manager may close the portfolio to new investors to ensure the portfolio is managed according to its mandate.

Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained from the Manager, free of charge.

PPS Investments (39270), PPS Multi-Managers (28733), PPS Investment Administrators (45924) and PPS Insurance (1044) are licensed Financial Services Providers. PPS Management Company is a licensed collective investment scheme manager. PPS Nominees is an independent nominee company approved by the Financial Sector Conduct Authority (FSCA).
