

Better Together

With MediaTek's 3GPP NTN-standard modem and Skylo's NTN service, smartphone and IoT manufacturers are able to develop new devices, sensors, and wearables with in-built satellite connectivity. This allows OEMs to offer connectivity experiences that weren't possible before, such as being able to text without any gaps or loss in coverage resulting in deeper customer relationships.

@skylotech

The MediaTek logo consists of the word "MEDIATEK" in a bold, white, sans-serif font, centered within a white parallelogram shape.

Skylo is a global non-terrestrial network (NTN) service provider, leveraging the standardized 3GPP ecosystem to offer seamless hybrid connectivity using existing, established satellites. Our network complements terrestrial cellular networks and functions as a roaming partner for terrestrial network operators, allowing subscribers an enhanced coverage and accessibility experience. Importantly, access to Skylo's network requires no change in the user hardware nor any additional/special antenna, as long as the device uses a compatible cellular modem capable of R-17 NB-NTN, certified by Skylo.

Skylo partners with existing satellite operators to orchestrate and unify multiple different satellites and spectrum with its technology. Skylo's RAN is installed into the existing satellite Earth stations that allow for immediate service, without the need to launch new satellites, and is compatible with upcoming LEO constellations.

Skylo's network integrates seamlessly with terrestrial cellular operators with standard core-to-core interfaces.

MediaTek Incorporated is a global fabless semiconductor company that enables nearly 2 billion connected devices a year. We are a market leader in developing innovative systems-on-chip (SoC) for mobile, home entertainment, connectivity and IoT products. Our dedication to innovation has positioned us as a driving market force in several key technology areas, including highly power-efficient mobile technologies, automotive solutions and a broad range of advanced multimedia products such as smartphones, tablets, digital televisions, 5G, Voice Assistant Devices (VAD) and wearables. MediaTek empowers and inspires people to expand their horizons and achieve their goals through smart technology, more easily and efficiently than ever before. We work with the brands you love to make great technology accessible to everyone, and it drives everything we do.
