

Hatching the Future of Public Safety

Hatch is a public safety innovation centre that connects deep-tech startups with operational end-users through mission-critical public safety challenges.

Access. Validate. Deploy

Hatch is the innovation centre of HTX (Home Team Science and Technology Agency), partnering with global deep-tech startups to accelerate public safety solutions from concept to deployable solutions.

Innovation Management

Hatch develops and delivers innovation programmes that help public safety organisations access and validate technologies globally.

Dimension X

Open innovation challenge to validate innovative PoCs for real-world public safety needs.

Hatch & Match

Start-up curation, matching deep tech solutions to defined challenges.

In-Beta

Proof-of-technology capability, verifying frontier technologies.

Tech Scouting

Mapping end-user requirements with what's available in the market.

Providing:

- Tech Insight Reports
- Tech Horizon Scanning
- Curated Companies List
- Strategic Foresight

Ecosystem Access

Bringing together five global hubs, government agencies, research institutions, and startup communities to advance public safety innovation.
