★ The bridge fuel for heavy industry

Two trading lines. One standard of assurance.

Every allocation — biomass or coal — moves through the same rigorous chain of certification, quality assurance and structured trade finance.

Biomass trading

Certified palm kernel shells, PKE, woodchips and emerging feedstocks sourced from verified Indonesian and Malaysian producers — vessel-ready, fully traceable.

[Explore biomass trading →](#)

Coal trading

Thermal coal supply structured to buyer specification, with independent inspection and full documentation handled end to end on FOB, CFR or CIF terms.

[Explore coal trading →](#)

Certifications & compliance

GGL certification, SGS / Intertek / Carsurin verification, and full Certificates of Analysis — so every cargo arrives with the paperwork your buyers require.

Palm Kernel Shells (PKS)

Our flagship product — a high-calorific, low-ash industrial fuel, GGL-certified for Japanese and Korean FIT/REC markets, and increasingly sought after across the GCC cement sector.

- ✓ Vessel-ready bulk supply on FOB, CFR or CIF terms
- ✓ Suited to utility power, cement kilns and industrial smelting
- ✓ Full Certificate of Analysis: NCV, moisture, ash and chlorine before loading
- ✓ Transactions structured under UCP 600

Southeast Asia production — shells, fibre, PKE

Westridge Solutions — SGS / Intertek verified

3

Bulk shipping

Vessel-ready supply — FOB, CFR or CIF

4

Industrial use

UAE, Japan, Korea — kilns, boilers, smelting

Myles Harris

Director, Westridge Solutions Limited

FOUNDER STORY

"The gap between Southeast Asia's production capacity and the **UAE's industrial energy needs** was obvious. Nobody was bridging it properly."

Westridge Solutions was built on three principles: regulatory rigour, logistical expertise, and financial security for both sides of every trade. We operate as a dedicated sourcing and trade-facilitation intermediary — our value lies in compliance and certified supply-chain management, not inventory holding.
