CONTAINMENT PANEL

accelevation

STANDARD FEATURES

The Accelevation Containment Panel is the culmination of decades of data center design and experience. This panel is designed to give you enough rigidity for a solid containment installation without adding unnecessary material cost and weight. Some just see a framed piece of plastic—we see a modular component designed to easily affix to a variety of connectors and components. After years of installing panels in data centers all over the world, this was designed with flexibility and value in mind.
