

Build your operations on intelligence, not fragmentation

Healthcare organizations are overwhelmed by inbound data across mail, fax, email, EDI, and APIs. Rather than stitching together disconnected tools, Smart Data Solutions delivers hands-free automation on a purpose-built, AI-native platform that ingests, understands, and routes work—transforming fragmented inputs into accurate data and seamless operational flow.

Our Foundational Intelligence Engine:

Data validation

Normalization

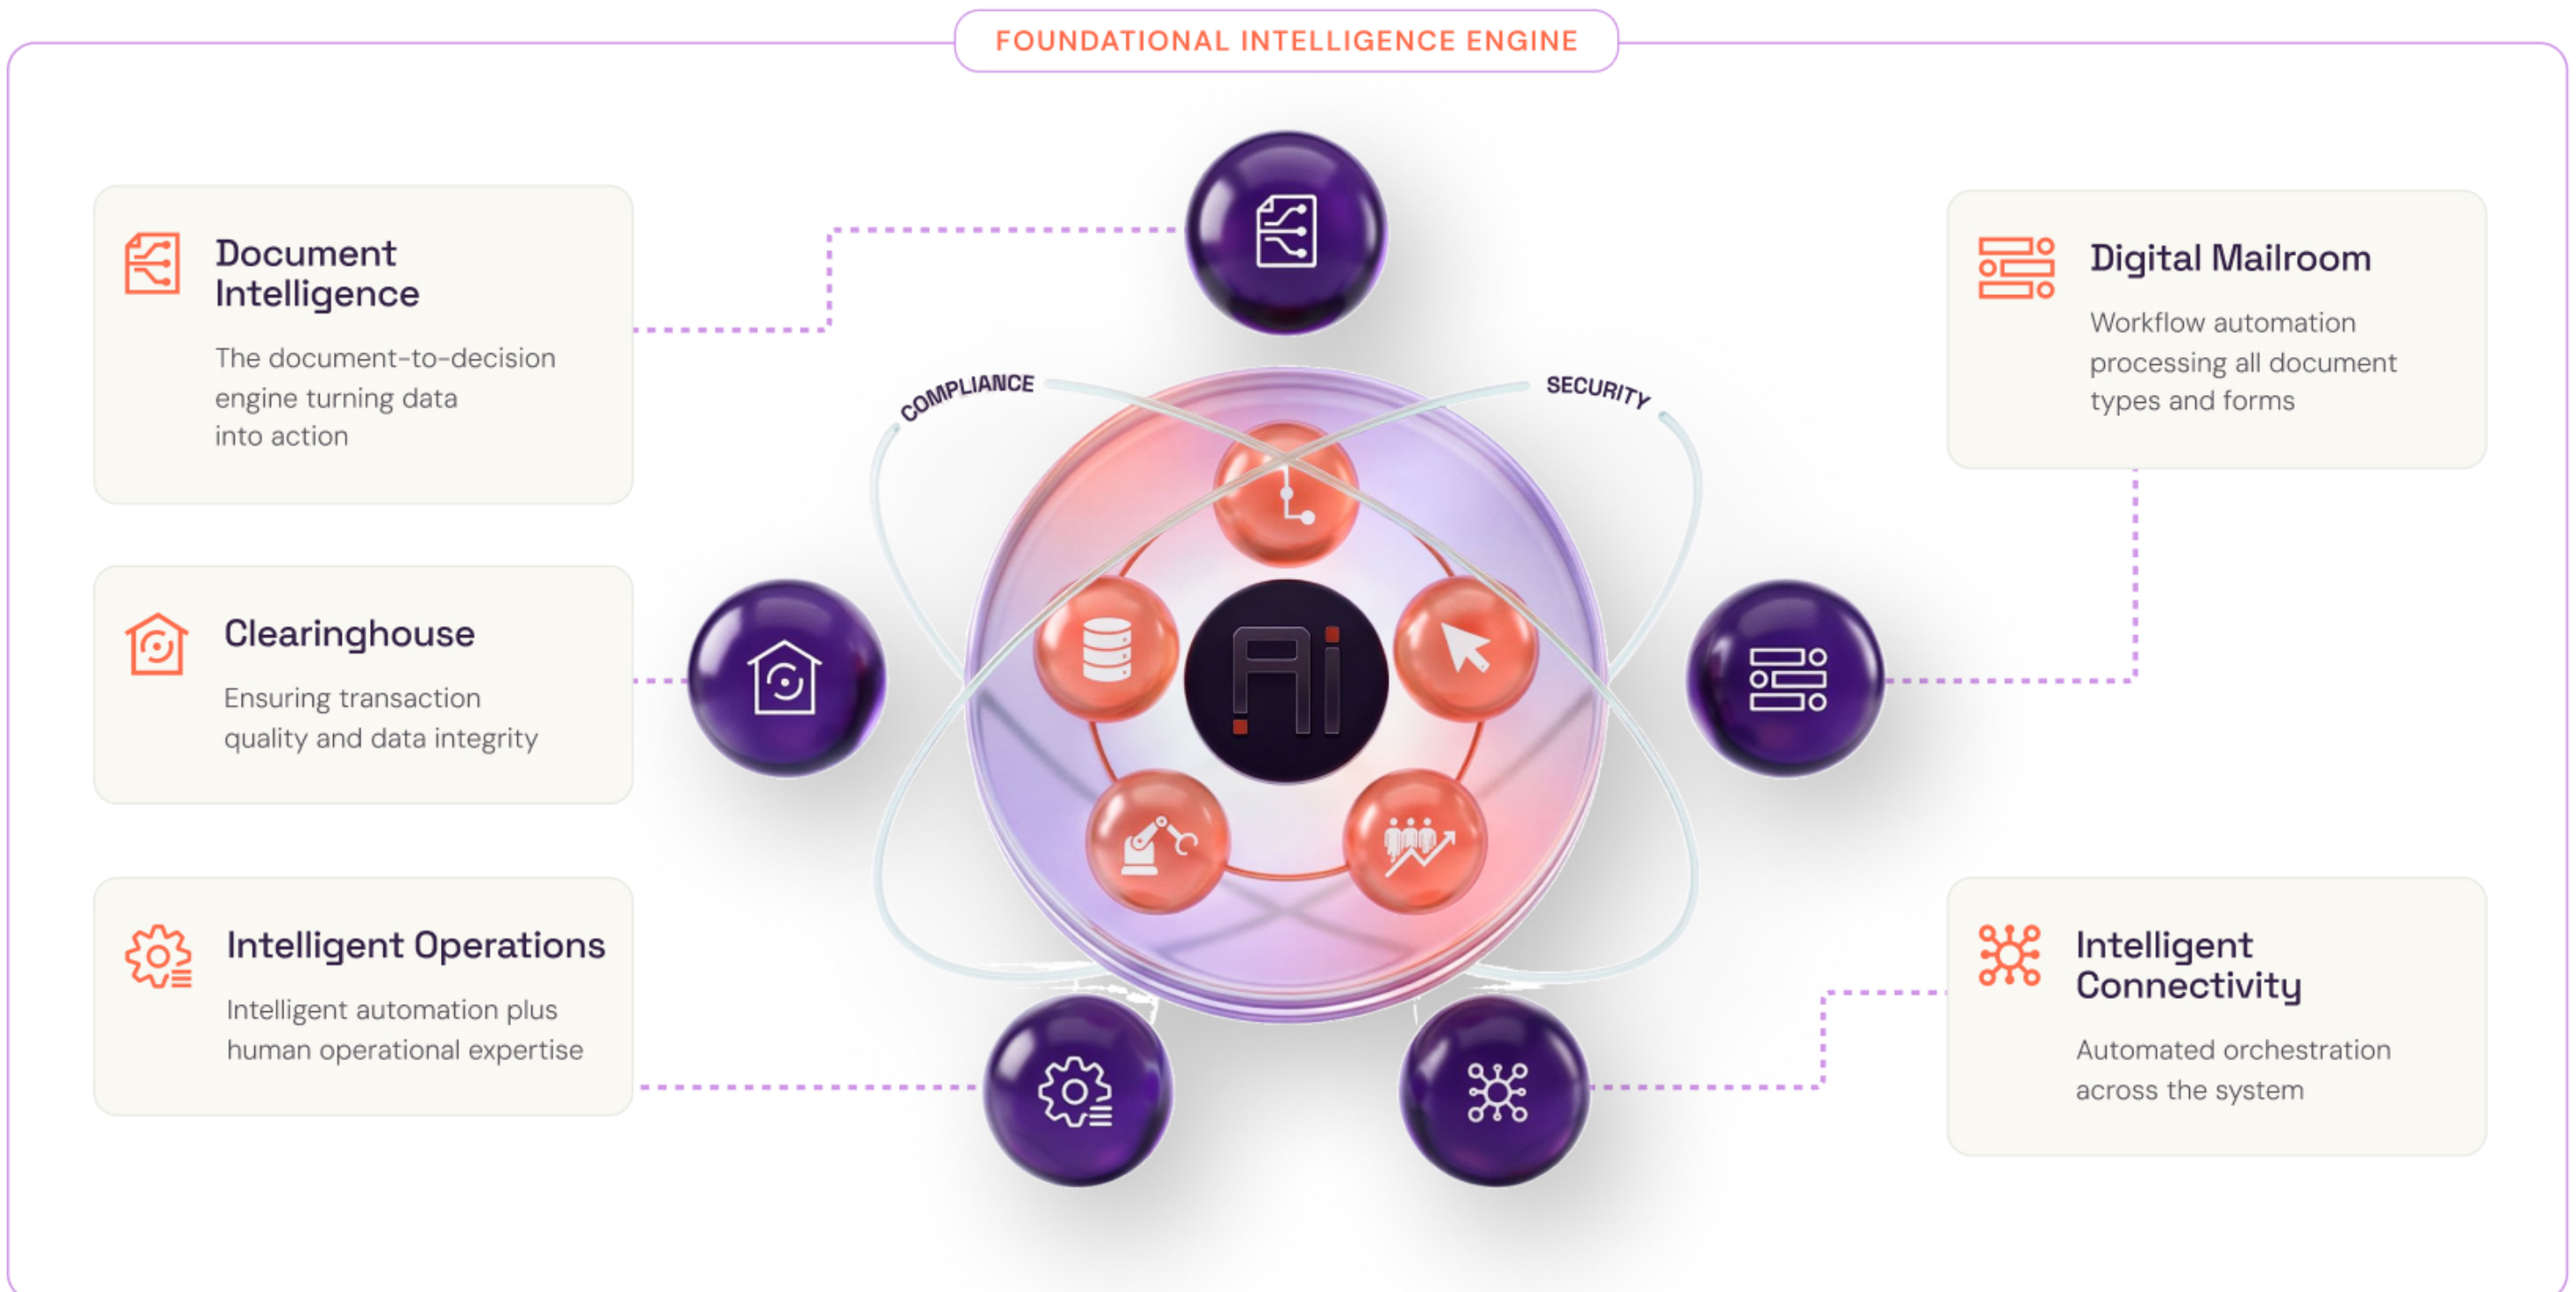

Governance

Routing

One platform. Every workflow. Fully Connected.

When intake, data, and workflows are unified, operations move faster, with greater accuracy and scale. The Smart Data Solutions platform powers every product and solution, ensuring work flows seamlessly across your organization.

✓ INTAKE & INGESTION

✓ GOVERNANCE, TRACEABILITY, & COMPLIANCE

✓ WORKFLOW & ROUTING AUTOMATION

✓ INTEGRATION & ENTERPRISE ORCHESTRATION
