

Turn complex documents into decision-ready intelligence

Critical healthcare decisions depend on information buried within complex documents. Yet extracting it still requires time-consuming manual review, delaying decisions and increasing operational burden.

Our Foundational Intelligence Engine:

Data validation

Normalization

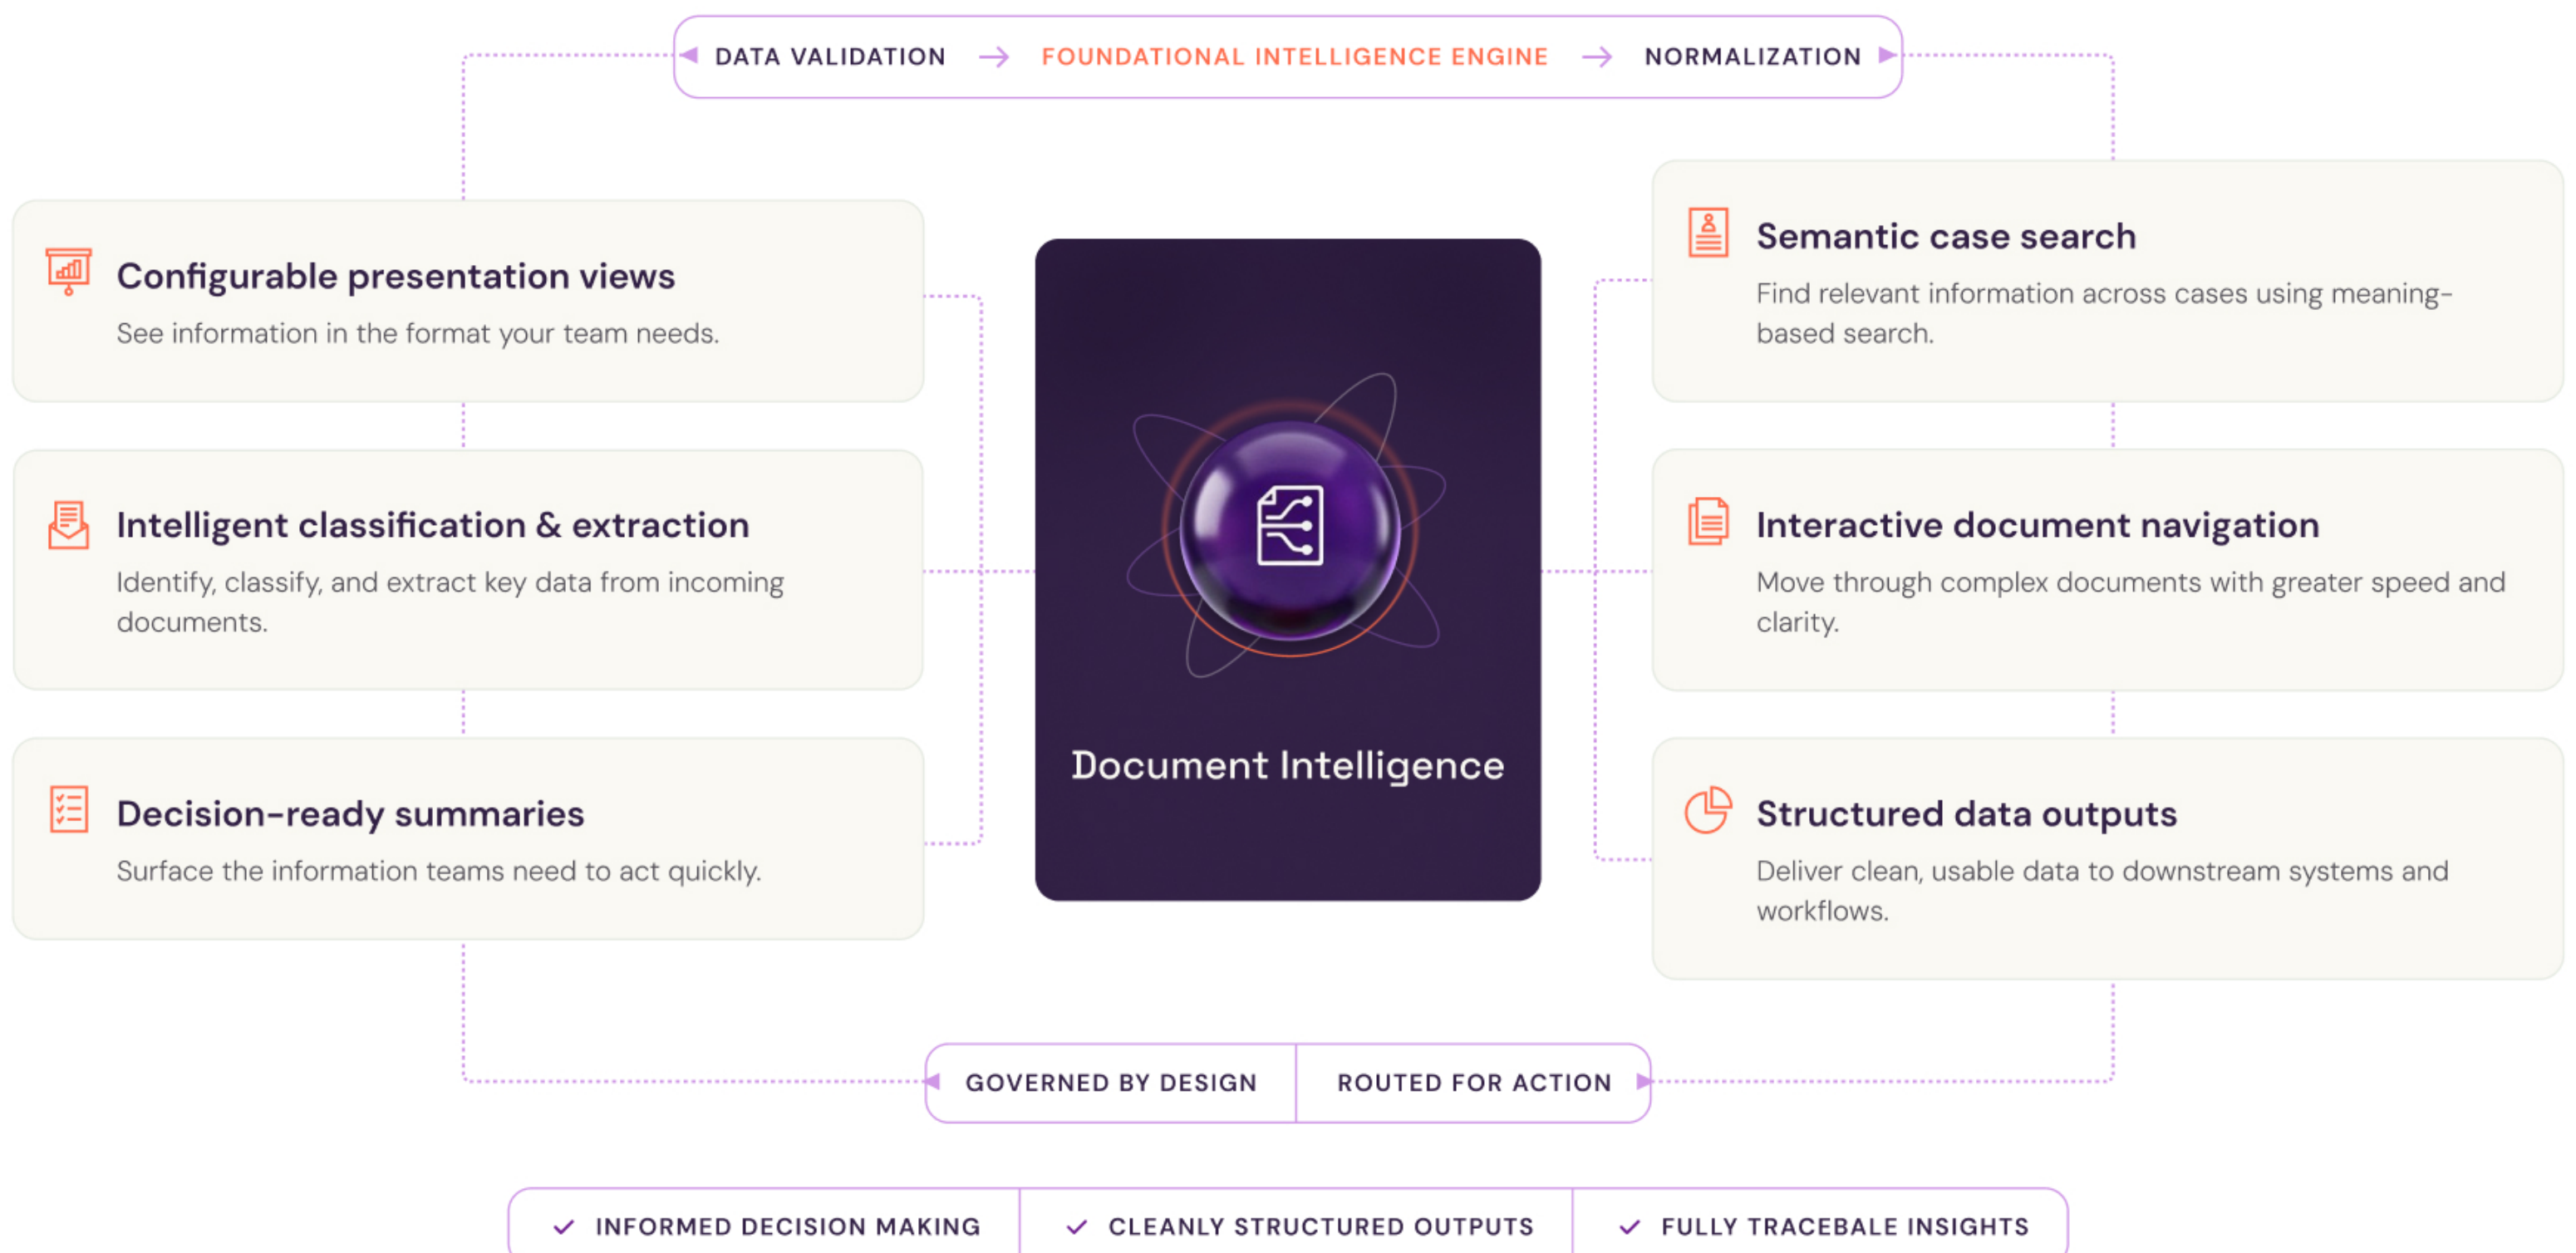

Governance

Routing

The **document-to-decision engine** enabling quick, accurate, and reliable decision-making

Document Intelligence from Smart Data Solutions transforms complex medical, contractual, and operational documents into structured, navigable, and actionable intelligence; helping teams make faster, more confident decisions.

Organizations using Document Intelligence typically achieve

40% - 50%

40-50%

faster document review cycles

\$2-3

return for every \$1 invested

73%

73%

reduction in administrative costs for prior authorization

Solution use cases

Intelligent medical records (IMR)

Provider contracts

Prior authorization

Utilization management

Appeals & case preparation

Surveys & health risk assessments

"When you have the opportunity to radically improve how people interact with the healthcare system, you find partners like Smart Data Solutions."

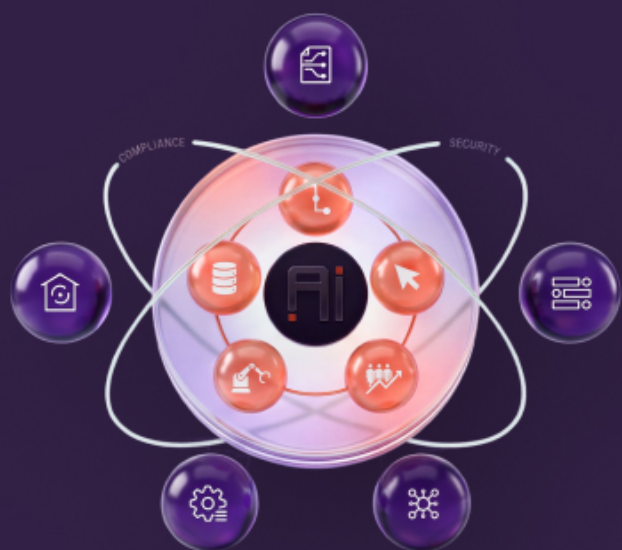

Katie Jones

Director of Claims Management,
Health Admins

Apply intelligent automation across your operational ecosystem
