WILL YOUR MANUFACTURING BUSINESS

MAKE HEADLINES THIS YEAR?

Toyota shut down 14 factories due to 'Insufficient Disk Space'

Having a hard time finding Clorox wipes? Blame it on a cyberattack

Southwest Airlines' holiday chaos could cost the company as much as \$825 million

Hackers say they stole 6 terabytes of data from casino giants MGM, Caesars

Sydney Trains to consider reimbursing impacted commuters on merit after network shutdown

T-Mobile says data on 37 million customers was stolen

BBC, British Airways, Novia Scotia among first big-name victims in global supply-chain hack

LET'S HOPE NOT.

But when **OUTAGES** and **BREACHES** fell the world's leading companies, it's probably time to assess **YOUR** system. Weak IT health and practices can have dire outcomes for manufacturers.

Downtime

\$300,000
/Hour

Average cost of downtime due to loss of application service
As much as **\$8.5 million** per day for manufacturers

Data Loss

\$143
/Record

Average cost to remediate comprised data
\$14 M to remediate 100,000 records

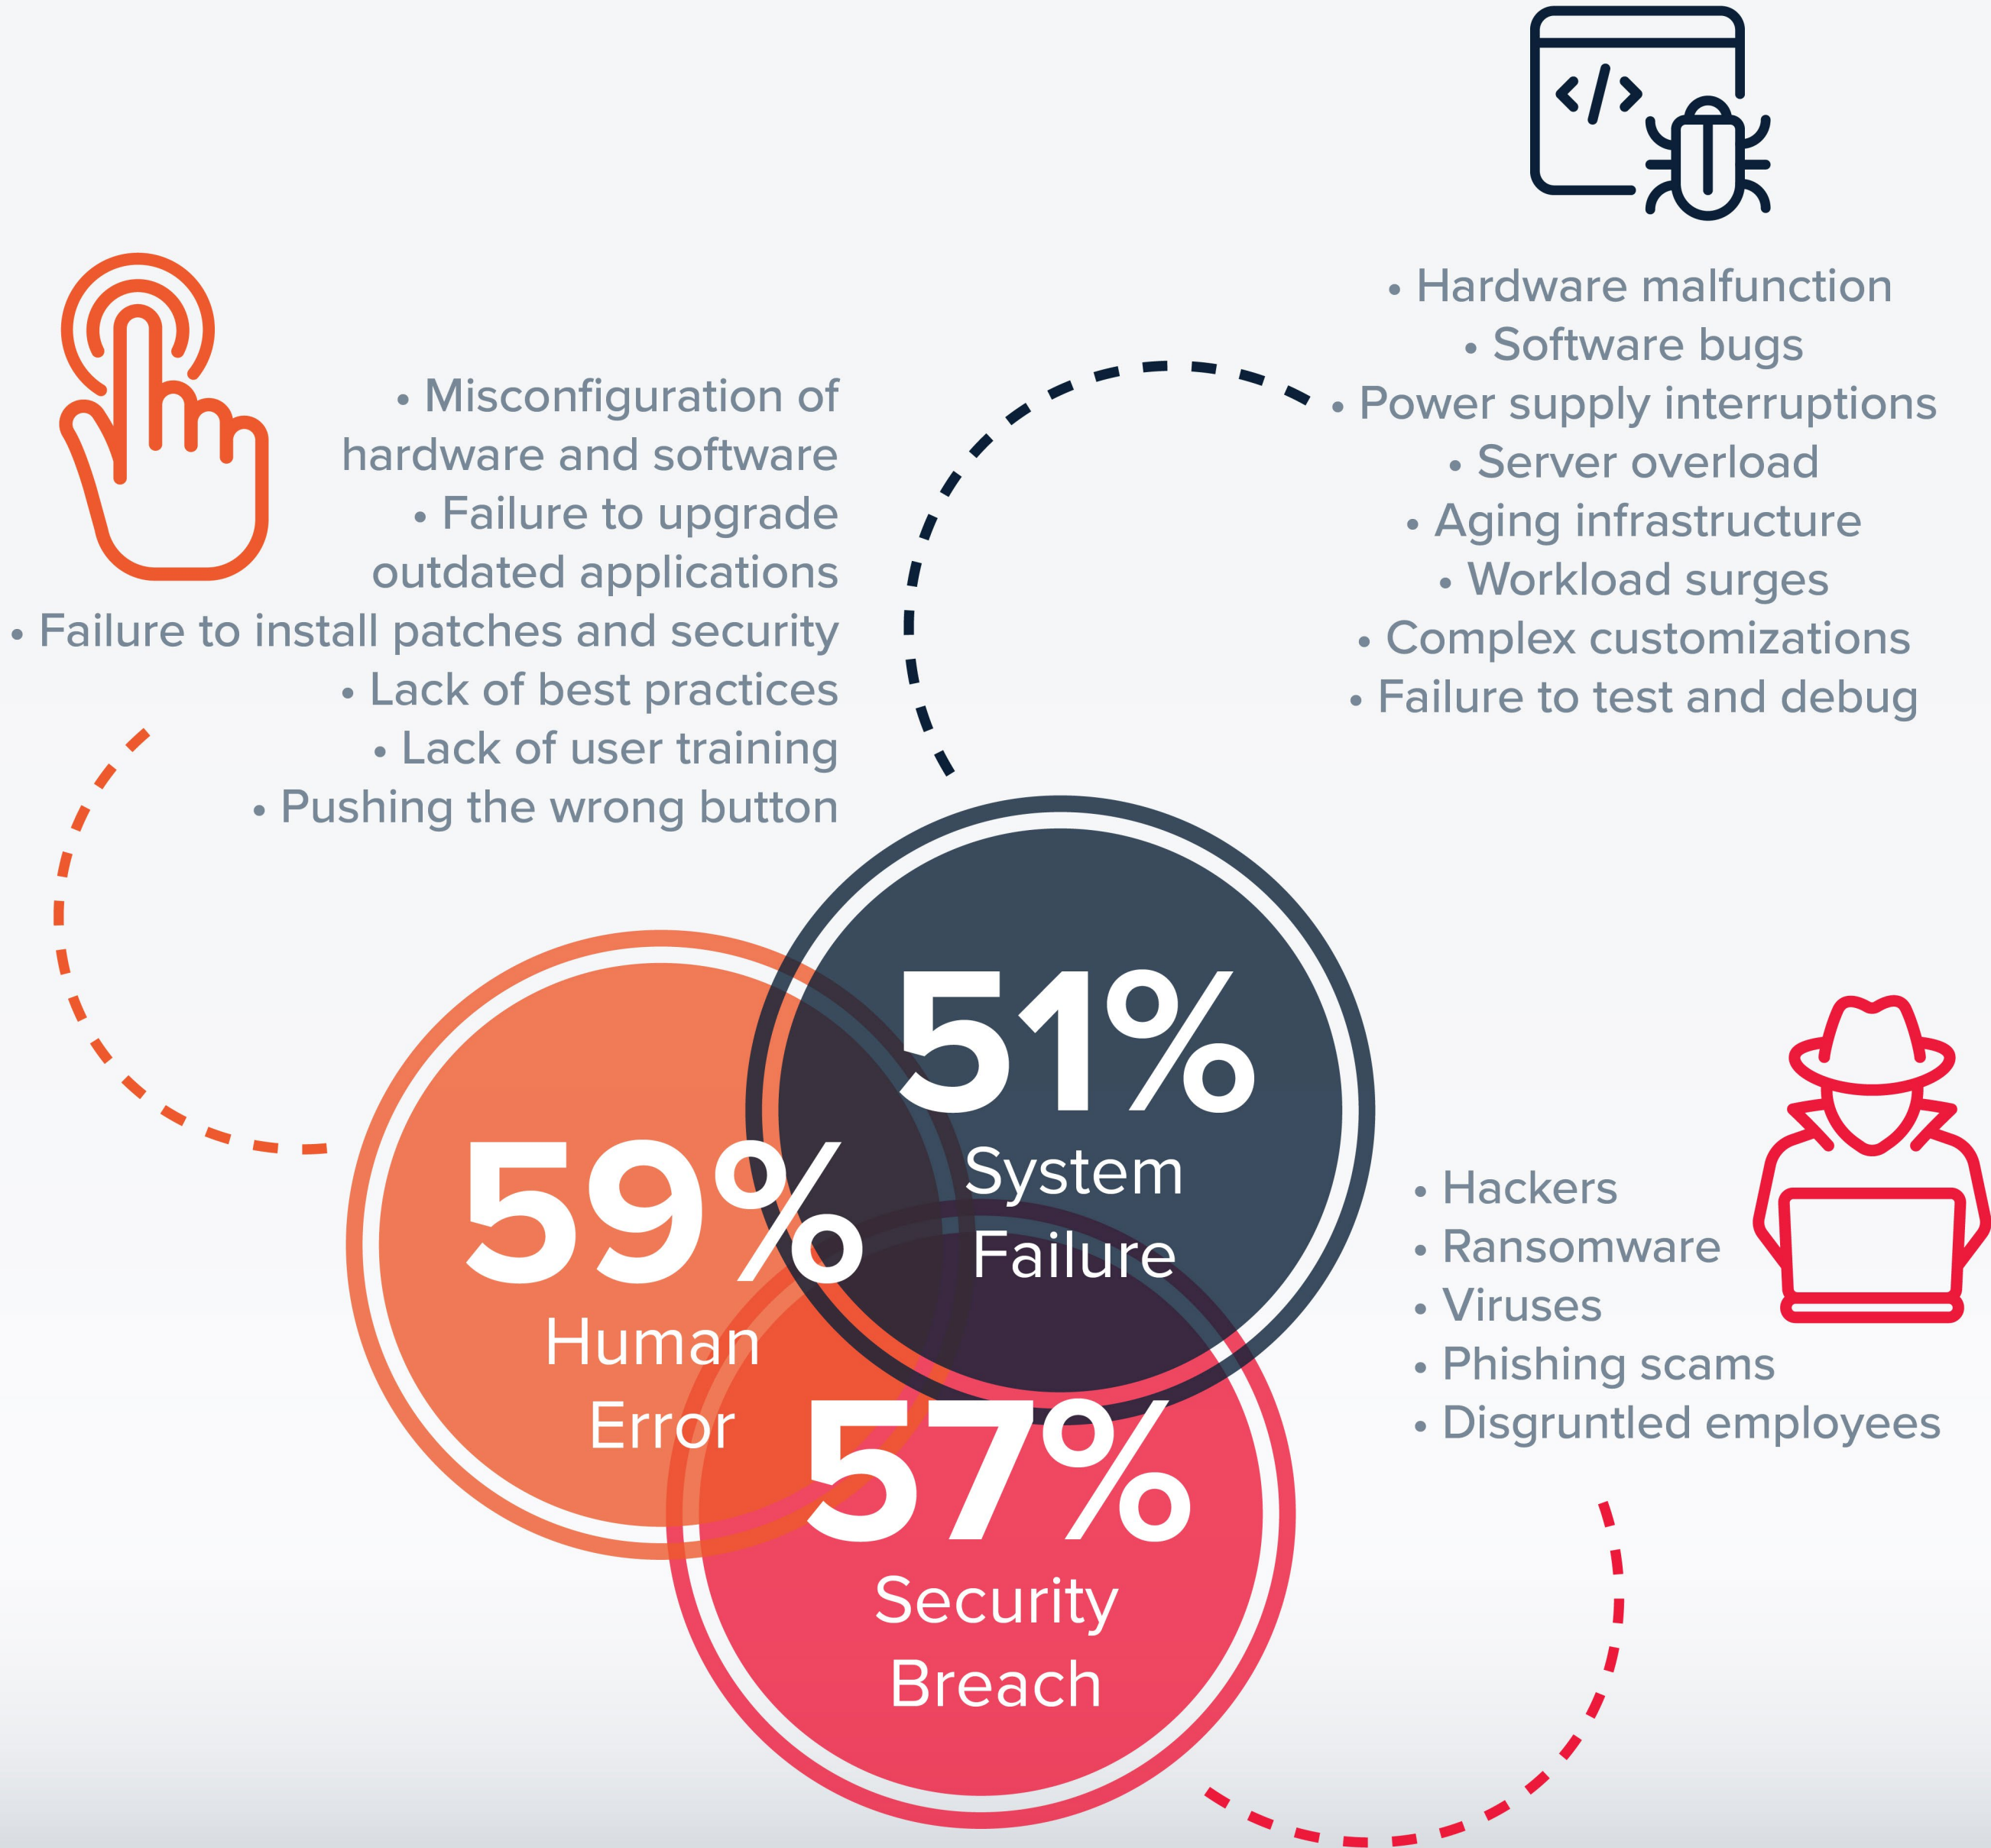

Reputation / Continuity Risk

\$10,000
/minute

If you're a supplier to an OEM, you might incur hefty charges for SLA violations - Or- you can run aground of regulatory compliance issues due to system outages

KNOWN and **UNKNOWN** vulnerabilities and risks can disrupt your operations when you least expect it. **MORE THAN 80%** of businesses have experienced major, unplanned IT system outages, with the three leading causes identified as:

Don't perpetuate unnecessary, potentially catastrophic, IT risks that can negatively affect your business performance.

In order to mitigate these risks, you first need to know where you're most vulnerable. Understanding your ability to adapt is key to avoid future disruption to your business and achieve your business goals.

Contact us for a complimentary
CHANGE READINESS ASSESSMENT

The first step to protecting your business against outages and losses is to identify your manufacturing data system's vulnerabilities and risks.
