

HOW FOREST PEOPLE DEFINE TOUGH

LOGLIFT 140Z / 150Z

COMPLETELY NEW REASSURINGLY FAMILIAR

Meet JONSERED 1400Z and JONSERED 1500Z. They have got all the ruggedness, reliability and productivity you've come to expect; with a range of brand new features for enhanced performance, safety and comfort.*

Take a look at some of their brand new features:

- Hydraulic Pilot Control gives you precision control over your crane movements, resulting in a smooth and flawless operation
- New high seat gives you better visibility, comfort and durability
- nDurance, a nano-technology paint process ensures all-weather protection
- HPL™ (Hose Protection Link) guards against impacts and sticking
- HiVision - Work efficiently, increase payload and save fuel.

* The JONSERED 1400Z and JONSERED 1500Z belong to the same family. The difference is that the JONSERED 1500Z has better close in performance due to power link. For full technical specifications, please refer to the table on page 8.

STRENGTHENING YOUR PERFORMANCE

Our forestry cranes have always delivered exceptional performance and rugged durability with low lifetime costs. The innovations in the new LOGLIFT 140Z and LOGLIFT 150Z reinforce our commitment to always provide you with the best. Discover what make the LOGLIFT 140Z and LOGLIFT 150Z perfect for you.

HPL™ (Hose Protection Link) to guard against blows and sticking

Protecting hoses on any crane is important, but especially in the harsh environment of log handling. Hose Protection Link (HPL) gives extra protection — from crane tip to rotator — against accidental impacts. The system includes the rotator and hanger to provide a complete and integrated solution.

- Robust link with a 40 mm upper pin
- Generous bearing dimensions for minimum wear
- Cleverly designed plug-in fittings
- Easy access for tightening, service and maintenance
- Quick-change hoses

Next generation forest people

HiVision™ is a new way of operating forestry cranes, using camera-based 3D vision technology. Work efficiently, increase payload and save fuel. With the camera-based 3D technology you operate your crane as you've always done, using the controls you've grown accustomed to over the years. The only difference is that you see the work area in special 3D goggles.

- Stay in the comfort of your truck cabin
- Be safe and work with optimal ergonomics
- Save weight and fuel
- Be more efficient when gaining payload

HiVISION™

New high seat for better comfort

Handling timber in the harsh environment of a forest is a challenging task. The new LOGLIFT 140Z and LOGLIFT 150Z have a newly designed seat that offers better driver comfort and durability.

- Elevated seat for better visibility and safety
- All-weather, anti-slip seat
- Adjustable armrest for better ergonomics
- New automatic stow function for easy parking, as an option
- Seatbelt included for increased safety

Three-year warranty

The new LOGLIFT 140Z and LOGLIFT 150Z are rugged and reliable machines and we're ready to stand behind this assertion with a three-year warranty. You can rest easy, secure in the knowledge that you've invested in a workhorse that will literally go on and on.

- Peace of mind with a three-year warranty
- Assurance that we're there to support you in the event your crane develops a problem

* 3 Year Warranty applies to the steel parts (base, column, first boom, second boom, extension booms, three point bridge and stabilizer beams).

Hydraulic Pilot Control

Hydraulic Pilot Control (HPC) is an optional control system that gives you smooth and easy operation. Regardless of your choice of control device; conventional or joystick type — we promise a feather-touch response.

- Precision control over your crane movements
- Smooth, flawless operation
- Reduced stress on crane structure
- Increased life expectancy of your equipment

Wide range of options

You want to have a crane that comes with options that are right for your application. The new LOGLIFT 140Z and LOGLIFT 150Z gives you just that. A wide range of hangers, rotators and grapples are available. Whether you're handling cut-to-length logs or full tree lengths, you can be sure you can get the job done — quickly and efficiently.

- Get more out of your equipment with well-adapted accessories

Wide service network

The new LOGLIFT 140Z and LOGLIFT 150Z is backed by the largest service and parts network in the industry. Where ever your business may be; wherever your work may take you, you can be sure we're there to support you.

- A Hiab-approved service centre or parts hub is never far away
- Scheduled service or repairs, you can be confident we'll have your crane back at work in no time at all

nDurance nano-technology paint process for all-weather protection

Rain, dust, sand and sunlight are unforgiving forces that wear on a crane all year around. This is why we have created nDurance — a technologically advanced and environmentally sound pre-treatment and paint process, based on nano-technology combined with state-of-the-art e-coating and powder painting.

- Nano-technology covers every square millimetre
- Three different protective layers for highest corrosion resistance
- 100 % phosphate free
- No heavy metals and virtually zero waste

nDurance™

NEW-GENERATION HI-CAB™ CABIN VISIBLY HIGHER PERFORMANCE

ENHANCED IN 125 DIMENSIONS

Safety, comfort, visibility. From top to bottom, every bit of the new-generation Hi-Cab™ cabin from LOGLIFT/JONSERED is held up to these standards with uncompromising care.

Enhanced in 125 dimensions, Hi-Cab™ is built to perform with immediate benefits and over the long haul. The Hi-Vis™ windows give you clear views, ranking highest in the market in visibility factor. You also gain a new high-performance air-conditioning system and stainless steel construction for low maintenance, along with OPS-approved door, advanced ergonomics and much more.

Lifting your performance

The long list of innovations and improvements you gain with the new-generation Hi-Cab™ cabin all work together for a long productive lifetime for your cabin. Rest assured, every element is rigorously researched, designed, constructed and tested for the highest performance.

Here are just a few of the advancements you gain.

■ Pure visibility

The innovative Hi-Vis™ panoramic windows give you the industry's highest visibility factor for great all-round visibility from the cabin – increasing safety and productivity.

■ High-performance AC

Strategically placed under the cabin, the AC is well protected against damage without adding additional height.

■ Long lifetime

The cabin is made completely from high-quality stainless steel, combining structural strength and rugged durability with low weight.

■ Comfortable productivity

The heated seat is both comfortable and adjustable to keep back, shoulders and neck relaxed through long working days. Armrests and pedals are adjustable and all switches are within easy reach.

■ Safety doors

Incredibly tough, the shockproof front door is OPS tested for ISO 8084:2003 standard, and greatly reduces the risk of injury if anything impacts the door.

Gain panoramic views with Hi-Vis.

Hi-Vis™ factor 5
(5 × more window than wall)

**Soundproof cabin design for
excellent noise mitigation**

**Sliding
side window**

**Ergonomic,
generously
proportioned seat**

**OPS-approved
shockproof
front door**

**High-quality,
low-maintenance
stainless steel**

**Outside valve
position for
easy service**

**Protected
under-cabin AC**

**Adjustable pedals
for added comfort**

Professional colour coordination

Match your Hi-Cab™ cabin to virtually any colour of the rainbow
— from your unique company colours to your own favorite hue.

LOGLIFT AND JONSERED HOSE PROTECTION LINK

Long live hoses!

Irregular loads such as logs, branches and scrap metal can be a problem and damage equipment – hydraulic hoses in particular are at risk. The Hose Protection Link, HPL, is a smart way of protecting them. Hydraulic hoses run from the crane tip through the link down to the rotator keeping them well protected, yet accessible for service and maintenance as necessary.

The Hose Protection Link itself is robust with a 40 mm upper pin and minimum bearing wear thanks to generous bearing dimensions. It is available on models including a telescope or a single extension boom with internal hose routing.

Easy tightening of telescope hoses

Occasionally hoses become slack and in telescopic boom systems this may cause them to slip out of their grooves inside the telescope and they must then be removed for repair. On cranes featuring double telescopic booms and Hose Protection Link, hoses are easy to tighten the instant they slacken and work may then proceed as normal.

Quick-change rotator hoses

Sometime hoses need changing. Cleverly designed fittings make this easy on cranes equipped with Hose Protection Link. Our plug-in fittings are easy to disconnect and connect and there is no need for follow-up tightening. The fittings are self-aligning – which reduces strain on hoses – and they seal really, really tightly.

Scale (optional)

A very reliable, quick-fit, easy-to-use scale helps maximize payloads and profitability while preventing overloads.

Swing damper (optional)

High workloads and fast handling may cause loads to swing. A swing damper steadies this motion and helps control the load. It also reduces strain on the equipment and prolongs component lifetime.

Rotator (optional)

The type of rotator and link can be customized to suit your precision and capacity requirements.
